

**Government of the District of Columbia
Office of the Chief Financial Officer**

Natwar M. Gandhi
Chief Financial Officer

September 24, 2008

The Honorable Adrian M. Fenty
Mayor of the District of Columbia
1350 Pennsylvania Avenue, NW – 6th Floor
Washington, DC 20004

The Honorable Vincent C. Gray
Chairman
Council of the District of Columbia
1350 Pennsylvania Avenue, NW – Suite 504
Washington, DC 20004

Dear Mr. Mayor and Chairman Gray:

This letter certifies, as of September 2008, revenue estimates for the FY 2008-2012 District of Columbia Budget and Financial Plan. The FY 2008 revenue is now estimated to be \$5,273.7 million, a \$17.2 million increase over the estimate made in May. For FY 2009, total non-dedicated Local Fund revenues are estimated to be \$5,432.2 million, which is \$130.7 million less than the estimate that was certified in May. Table 1 below compares the current revenue estimate to the previous estimate.

Table 1: September 2008 revenue estimate compared to previous estimate

Local Source, General Fund Revenue Estimate	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012
(\$ millions)					
Local Fund revenue estimate of May 2008	5,255.3	5,374.2	5,639.1	5,906.8	6,198.2
Impact of policy changes included in FY 2009 Budget and Financial Plan	1.2	188.7	192.5	192.5	204.3
Total local Fund estimate including tax policy	5,256.6	5,562.9	5,831.7	6,099.2	6,402.5
Additional revenue from revised estimate	17.2	(130.7)	(152.0)	(148.6)	(162.4)
September 2008 revised estimate	5,273.7	5,432.2	5,679.7	5,950.7	6,240.1
<i>Percent growth over previous year</i>	<i>1.6%</i>	<i>3.0%</i>	<i>4.6%</i>	<i>4.8%</i>	<i>4.9%</i>

Current Economic Conditions

The National Economy

- During the past two weeks the U.S. Treasury and the Federal Reserve System have made (and continue to make) significant interventions in the US financial markets. These actions are intended to stabilize markets which were in the midst of the worst crisis since the 1930's. At this point the extent of the losses, the impact of financial markets on the real economy and the degree to which federal interventions will be successful are not known. As a result, there is a high degree of uncertainty in the economic outlook for the Nation, including the District of Columbia government.
- The immediate concern with respect to the District of Columbia revenue outlook is that of the interplay between the stock market and the performance of the individual income tax. As of September 19, the stock market as measured by the Standard and Poor 500 Stock Index was down 14.5% for all of calendar year 2008 to date. The Index was 19.8 % below its peak last October.
- On a seasonally adjusted basis, there have been 8 straight months of negative job growth for the first time in almost 5 years, for a loss of 605,000 jobs.
- Although real GDP grew at an estimated 3.3% rate in the 2nd Q of 2008 on a seasonally-adjusted basis, this was boosted in part by the stimulus tax rebate, and growth is forecast by Blue Chip indicators and others to slow down once again.

The District Economy

Thus far, the District's economy has been faring better than the national one. However the housing market and the value of all real estate transactions remain quite weak and tax collections are slowing.

- For the quarter ending in June 2008, jobs located in D.C. were up 1.5% over the same quarter of FY 2007, far stronger than the 0.1% increase for the U.S. and 0.7% for the Washington metropolitan area suburbs.
- In the quarter ending in June 2008, D.C.'s resident employment was up 1.0%, compared with 0.1% growth at the national level and growth of only 0.4% for D.C.'s suburbs. However, D.C.'s unemployment rate in the June quarter—6.2%—was up from 5.5% a year earlier because D.C.'s labor force grew faster than resident employment.
- In the June 2008 quarter wages earned in D.C. were 5.7% higher than a year earlier and wages earned by D.C. residents were 6.3% higher, outpacing the 4.1% gain in the U.S. as a whole.

- Hotel receipts from stays in the District of Columbia were up 5.2% in the June 2008 quarter compared to the same period of 2007. However, airline passenger counts for the June 2008 quarter at the three area airports were down 2.6% from 2007.
- The number of sales of single family and condominium housing units in the 3-month period ending in July 2008 were down 15.1% and 26.3%, respectively, from the same period in 2007. Average prices of units that sold were up 1.6% for single family units and down 1.6% for condominiums.
- In the quarter ending in June 2008 there was an 8.1% decline from June 2007 in the OFHEO purchase price index that tracks the prices of the same D.C. single family properties financed in whole or in part by conforming mortgages. Housing permits issued in D.C. in the 3-months ending in June were 56.3% below a year earlier.
- In the 3 months ending in July, 957 foreclosed properties were either taken over by lenders or put up for auction. This number of foreclosures is the equivalent of 53.4% of all brokered sales during that period, and represents 8.1% of all such foreclosures in the D.C. metropolitan area.
- At the end of June 2008 the vacancy rate for commercial office space in the District edged up, but only slightly, to 6.7%; it was 6.5% in March.
- The value of property sold that was subject to either the Deed Transfer tax or the Economic Interest tax also declined by 44.6% in the 3 months ending in August compared to the same period in 2007.
- Through August, total tax collections for the 11 months of FY 2008 were up 2.1% over the same period of FY 2007. (By contrast, collections at this same point in FY 2007 were 12.4% higher than in FY 2006.) Collections for all deed taxes (deed recordation, deed transfer, and economic interest taxes) before earmarking were down 29.1% for the 11 months of FY 2008 compared to FY 2007.

Economic outlook

National

As noted above, the outlook for the US economy remains uncertain, with severe financial market difficulties, falling employment, declining real estate values, and persistent inflation. In early September, a majority of the 50 panelists contributing to the Blue Chip Economic Indicators said the U.S. economy would not slip into recession this year, although they anticipated declining personal consumption expenditures in the last two quarters of this calendar year.¹ The September Blue Chip forecast was, however, made before the recent dramatic financial market developments. In early September the Congressional Budget Office significantly cut its forecast of real GDP growth in FY 2009 to 0.9% from the 2.3% estimate made last January. Once again, this forecast was made before the recent financial market turmoil.

The District

In view of the uncertainty in the U.S. economy, the September revenue estimate assumes an economic slow down for the District of Columbia.

- The presence of the federal government generally has a stabilizing effect on the District's economy. In the U.S. downturns of the early 1990's and 2001, however, the District's economy slowed when U.S. economy slowed. Thus far, as noted above, the District labor market has done much better than the U.S. as a whole. The current revenue estimate assumes that the District will not be able to avoid some of the difficulties experienced at the national level. Accordingly, the revenue estimate assumes that job growth will slow and D.C. will experience 3 quarters of negative real economic growth, with recovery beginning toward the end of FY 2009.
- One clear connection between D.C. and the national economy is the stock market. The bursting of the stock market bubble in 2001 was the most significant reason for the decline in D.C. revenues in FY 2003. Capital gains as a share of federal adjusted gross income are 12.7% for D.C. compared to 9.8% for the U.S., 7.8% for Virginia, and 7.2% for Maryland.
- Significant improvement in the District's housing market is not expected until 2010.
- Vacancies in commercial office space are expected to rise over the next 2 years but remain below the US average.

¹ Blue Chip Economic Indicators: September 10, 2009, p.5.

Estimating assumptions for FY 2008 and FY 2009, respectively, include:

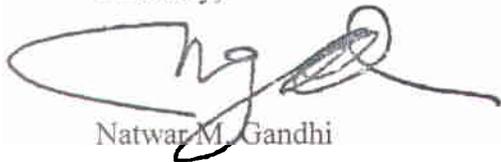

- Change in total jobs of 1.3% and -0.2%.
- Change of 1.4% and -0.8% in D.C. resident employment.
- A 5.5% and 2.6% increase in D.C. Personal Income.
- Stock market decrease of 5.5% in FY 2008, followed by further decrease of 7.7% in FY 2009.
- Declines in the number of home sales of 20.0% and 10.0%.
- Average home sale price declines of 2.0% in each of FY 2008 and FY 2009.

Risks to the District Revenue

- The assumptions underlying the September revenue estimate are not a worst case scenario.
- The uncertainty surrounding the national and District economic outlook remains very worrisome and requires careful monitoring. Should, for example, the current slowdown become more severe or protracted or should the stock market decline further and fail to recover, District revenues would likely be slower in FY 2009 than those contained in this revenue estimate.
- The District economy is vulnerable to cutbacks in federal spending or to national security events of some type.

If you have any questions regarding this matter, please contact me on (202) 727-0065.

Sincerely,

Natwar M. Gandhi
