
Revenue

Introduction

The economic outlook for the District of Columbia and the United States in FY 2005 and FY 2006 is good. Across the nation, despite weaker than expected economic growth in the first quarter of CY 2005 most economists expect a recovery in the second half of 2005 due to higher productivity, greater government spending, and reduced geo-political risks. Employment and income are also expected to show significant gains.

The District will benefit from the national growth and some additional strengths of its own. Higher federal spending means an extra "kick" locally because more than our share of these dollars will be spent here. Currently, small business growth is helping the economy in the District and this is expected to continue, adding jobs and economic activity. Retail activity will improve somewhat, as the number of retail outlets in the District continues to grow and as shoppers increase their spending. The new National Museum of the American Indian and the World War II Memorial on the National Mall, along with other shopping and eating venues, add to expected business in the hospitality sector in FY 2005 as does the return of Major League Baseball.

The estimating assumptions for FY 2005 and FY 2006 include about 1 percent growth each year in total jobs; 5.0 percent and 5.5 percent increases in personal income of District residents; and inflation of 2.8 and 2.3 percent. Most of the increases in jobs and wages will be in the District's key pri-

vate sector service industries: professional and business services, education, health, membership organizations, retail, and hospitality services, although overall job growth in the District moderated in February and March of this year.

One key economic question for the District in FY 2005 and on into FY 2006 is "What will happen in the market for real property?" Substantial increases in prices and the number of transactions in both residential and commercial real estate markets were major sources of revenue gains in FY 2003 and FY 2004. These factors are expected to contribute significantly to FY 2005 and FY 2006 revenues as well. In FY 2003 and FY 2004 the assessed value of all taxable property in the District (before the application of any caps or credits) increased 10.6 percent and 14.5 percent, respectively. In addition, the total value of taxable real property sales grew 53 percent in FY 2004, following a 30.5 percent increase in FY 2003.

The key fundamentals affecting the District's real estate markets remain strong: the District's economy is growing, individuals and businesses both continue to demonstrate a desire to locate in the District, and the supply of housing and land for commercial development cannot increase very rapidly. Accordingly, we expect real estate values and the total value of transactions to continue to grow at rates close to those experienced in the past two years.

The real property tax baseline will continue to increase by about 12.6 and 9.7 percent during FY 2005 and FY 2006. However, there have

been policy changes that increased the homestead exemption to \$38,000 and capped homestead tax increases at 12 percent in FY 2005. And, despite the growing value of real estate transactions, deed tax collections are estimated to decrease in FY 2005 due to the 26.7 percent rate reduction (from 1.5 percent to 1.1 percent) that took place at the beginning of FY 2005; then they will continue their upward march by 15.8 percent in FY 2006.

In total, these economic effects will shape the revenue collections by the District of Columbia in FY 2005 and FY 2006. Growth in personal income and an expected recovery of the financial markets, will contribute to the rebound of individual income tax revenues and we forecast growth of 4.4 and 1.6 percent in each year, respectively. Franchise tax revenues also will grow, with increases of about 13.6 percent in FY 2005 and 2.7 percent in FY 2006, and sales taxes will go up.

In all, total revenue available for general fund purposes in FY 2005 is forecast to be 5.3 percent greater than in FY 2004 and to grow another 5.6 percent in FY 2006. The growth in total general fund revenue in FY 2004 was 9.7 percent over FY 2003.

Although the national and local economies continue to show considerable strength, recent developments suggest that risks to the economy are growing. The first quarter GDP data released in April by the U.S. Department of Commerce shows that real U.S. GDP growth slowed to 3.1 percent from 3.8 percent in the previous quarter. If this trend persists, a slowing U.S. economy would eventually impact the District economy, primarily through its dampening effect on tourism receipts.

Another risk factor to the economy is inflation. Driven primarily by higher oil prices, inflation may be a real threat to the national economy. Rising inflation combined with current imbalances in the economy—in particular, the record-level budget and trade deficits—could lead to a sharp upward movement in long-term interest rates. The District's revenue estimates are vulnerable to a sharp rise in the interest rate; our forecast calls for a gradual rise in long-term interest rates. A sharp rise in interest rates could cause more slowing of growth in the real estate market than we are forecasting here. The uncertainties involved in projecting changes in real estate mar-

kets that have such a big impact on revenues are comparable with those encountered a few years earlier in trying to anticipate the performance of the stock market, which had such a large impact on income tax revenues.

Also, the S&P 500 is down by 2 percent since the beginning of the year (it was down by as much as 5 percent but has recovered somewhat). A sharp decline, or a prolonged period of stagnation in the U.S. stock market, would adversely affect the District's revenues, particularly the individual income tax revenues as stock market returns for the current year are a significant determinant of the changes to income tax revenue in the year that follows.

Another source of risk to the national economy is the possibility of faltering employment and income growth caused by a host of issues like the weakening of the dollar compared to other major currencies in the world, or an increasing national debt, which may raise interest rates further. National forecasters expect a strong job market recovery that will cause wages, salaries and personal income to grow as well. Stagnation particularly could lead to a cutback in consumer spending, especially in the hospitality industry.

Finally, potential changes in the pattern of federal spending carries some risks for the District's economy. Federal spending is the significant economic underpinning of the entire Washington D.C. Metropolitan area, including the District of Columbia itself. Security concerns arising out of 9/11 and the Iraq war have resulted in large increases in government spending that benefited the Washington D.C. area. Efforts to reduce government spending over the next few years to bring greater balance to federal fiscal policy could dampen growth in the District of Columbia.

Economic Assumptions for the FY 2006-2009 Revenue Estimates and Financial Plan

The U.S. Economy

The national economy continues to be strong. According to the U.S. Bureau of Economic Analysis, U.S. Real Gross Domestic Product grew at a seasonally adjusted annual rate of 3.9 percent during the quarter that ended on December 31, 2004, down slightly from a 4.0

Table 4-1

Selected U.S. Economic Indicators: 2003 Fourth Quarter to 2004 Fourth Quarter

(Percent change from same period of previous year unless noted)

	2003.4	2004.1	2004.2	2004.3	2004.4
GDP:					
Real	4.4	5.0	4.8	4.0	3.9
Nominal	6.2	6.8	7.1	6.3	6.4
Employment (Wage and Salary)	-0.1	0.3	1.1	1.4	1.6
Income:					
Wages	4.0	4.3	4.7	5.4	5.4
Total personal income	4.6	4.9	5.3	5.3	6.6
Inflation (CPI)	1.9	1.8	2.9	2.7	3.3
S & P 500:					
Level	1056	1133	1123	1104	1162
Change from prior quarter	5.6	7.3	-0.9	-1.6	5.2
Change from prior year	19.1	31.8	19.7	10.4	10.0
Interest rate (10-yr. Treasuries)	4.27	4.00	4.58	4.29	4.16

percent rate in the previous quarter. Nominal Gross Domestic Product and Nominal Personal Income in the quarter that ended on December 31, 2004 were 6.4 percent and 6.6 percent higher, respectively, than in the same quarter of 2003.

Concerns about sluggish growth in employment and wages in the recovery from the 2001 recession are finally abating. In the quarter ending December 31, 2004, employment was up 1.6 percent, and wage and salary earning were up 5.4 percent from the prior year. Employment in February 2005 was 1.8 percent higher than a year earlier.

For guidance, this survey of the economic factors affecting the District's revenue base uses forecasts of the U.S. economy prepared by the Congressional Budget Office (CBO) and the Blue Chip Indicators, along with those of two forecasting services, Global Insight and Economy.com. Highlights of the forecasts for the United States economy are:

- Economic growth in FY 2005 and FY 2006 will continue, but at a rate about one percentage point below FY 2004's 6.6 percent increase in nominal GDP. Growth rates in nominal GDP for the U.S. are expected to be about 5.8 percent in FY 2005 and 5.5 percent in FY 2006.

- Due to the pick up in employment and wages that has begun to occur, wage and salary growth will be higher in FY 2005 and FY 2006 than the 4.5 percent increase in FY 2004.
- Inflation will be modest. The CPI is expected to increase at a 2.8 percent rate in FY 2005, up from 2.3 percent in FY 2004, then decline in FY 2006, as energy prices recede somewhat from their FY 2005 peak and productivity gains and imports continue to moderate the price impact of wage increases. The Financial Plan assumes inflation will be 2.8 percent in FY 2005 and 2.3 percent in FY 2006.
- Gradually rising interest rates. The interest rates on 10-year Treasury securities are expected to rise slightly from 4.3 percent in FY 2004 to about 4.5 percent in FY 2005. In FY 2006 rates are anticipated to be between 5 percent and 5.6 percent, as the markets adjust gradually to the fiscal imbalances caused by the trade and federal budget deficits. The Financial Plan assumes the interest rate on 10-year Treasury securities will be 4.5 percent in FY 2005 and 5.2 percent in FY 2006.

- Moderate stock market gains Economy.com and Global Insight both expect the stock market to grow in FY 2005 and 2006, building on the 19.8 percent increase that occurred in FY 2004, although they differ in the amount of gain that will occur. (In December 2004 the market closed the year at a 3 ½ year high). The two services forecast single digit increases in FY 2005 ranging from 6 percent to 9 percent, with subsequent growth in FY 2006 ranging from 3 percent to 11 percent. The Financial Plan assumes the market will gain 8.5 percent in FY 2005 and 6.1 percent in 2006, essentially the average of two forecasting service estimates.

The D.C. Economy

The outlook for the District remains favorable if things go well nationally. However, because the rate of growth in federal spending is expected to slow, the growth in the District's economy for FY 2005 and FY 2006 is not expected to outpace that of the U.S. economy (see table 4-2 for key variables affecting the District's economy).

The FY 2006 Proposed Budget and Financial Plan assumes that output, income, and employment will continue to increase like the national economy in FY 2005 and FY 2006. The driving force is the gain in major services (professional and business services, health, education, and membership organizations). The Plan also assumes that the value of real estate will continue to increase at double digit rates in both FY 2005 and FY 2006. In FY 2005 the population and resident employment are both expected to stabilize, and begin to increase in FY 2006.

Highlights of the economic assumptions are:

- *Nominal Gross State Product.*¹ Growth rates in FY 2005 and FY 2006 are 5.6 percent and 5.2 percent, respectively, somewhat less than

the 6.2 percent growth for FY 2004. As noted, the slower growth rate in the next two years reflects the fact that the District has already recovered from earlier slowdowns. Major services, government, and retail and hospitality all contribute significantly to the increase in GSP.

- *Jobs Located in D.C.* The number of Jobs in the District in FY 2005 is expected to show a net increase of 5,700 (0.9 percent), then increase another 7,300 (1.1 percent) in FY 2006, mostly in response to a stronger economy.
- *Personal income.*² Growth rates in FY 2005 and FY 2006 are 5.0 percent and 5.5 percent, respectively, about comparable to the 5.1 percent growth for FY 2004.
- *The value of real estate.*³ In FY 2005 the number of housing sales is expected to increase only about 1 percent, but the average price of units sold is expected to increase by 17.0 percent, and rise again in FY 2006 by another 10.6 percent. This increase in prices, which follows the 18.4 percent increase experienced in FY 2004, is due to both supply and demand factors in the District's residential market. Comparable gains are expected in commercial values as well.
- *Resident employment, households, and population.* The Financial Plan assumes that FY 2005 will be the ending point for declines in population and resident employment that occurred in prior years. The FY 2006 estimated population of 558,800 is up 4,600 (0.8 percent) from FY 2004. In FY 2006 the increases in housing construction and in the number of District households are finally expected to translate into gains in total population and employed residents as well. The unemployment rate is expected to rise, how-

¹ GSP, the value added in production by the labor and property located in a state, is a measure of the gross output of all industries in a state.

² Personal income is a measure of before-tax income received by all persons in a state. It is the total of net earnings by place of residence, rental income, personal dividend income, personal interest income, and transfer payments. Wages and salaries are the biggest component of personal income. Health and other employee benefits are also a significant component.

³ In the table, the number of sales and average price of residential real estate is measured by the average selling price of single family and condominium units as reported by the Metropolitan Regional Information System (MRIS), as accessed through the Greater Capital Area Association of Realtors. The MRIS system reports only sales handled by brokers.

ever, from 7.8 percent in FY 2004 to 8.5 percent in FY 2005, as the increase in D.C. residents employment does not keep up with

the increase in the District's labor force.

Note: Estimated by the D.C. Office of Revenue Analysis based on forecasts of the D.C. and national economies prepared by Global Insight (Winter 2004) and Economy.com (November 2004); on forecasts of the national economy prepared by the Congressional Budget Office (January 2005 and Blue Chip Economic Indicators (February 2005); on BLS labor market information from January 2005; on Bureau of Economic Analysis estimates of D.C. Personal Income (December 2004); and on D.C. housing sales data from the Metropolitan Regional Information System (MRIS) accessed through the Greater Capital Area Association of Realtors (February 2005).

Employment

The District's forecast of employment growth in FY 2005 is 0.9 percent and 1.1 percent in FY 2006. Major services account for 83 percent of the gain and retail and hospitality for 19 percent, more than offsetting net declines in government and other private industries.

Employment in the District slumped in 2003, but has bounced back since, with growth led by professional, business, and other major services and by retail and hospitality services. This gain shows solid job growth, albeit at a slower rate than that in the still recovering U.S. economy and less than half of that prevailing throughout the Washington Metropolitan area (see table 4-4).

Employment in both the federal and local governments increased slightly over the past

year. Recent positive developments include the transfer of jobs to the Navy Yard site in Southeast Washington D.C., and the decision to locate the Homeland Security Department in the District.

Retail trade and hospitality are an important source of employment and earnings. In the quarter ending December 31, 2004, these two sectors added 1,400 jobs, a 2.0 percent gain. The new D.C. convention center and downtown revitalization are factors in the strength of the leisure and hospitality industry, as are events like the opening of the National Museum of the American Indian. In the quarter ending December 31, 2004, hotel revenues were up 20.6 percent from a year earlier (see table 4-5).

Table 4-3

Change in D.C. Wage and Salary Employment by Sector in the Quarter Ending December 31, 2004, Compared With the Same Period of the Previous Year

Sector	Level	Change from one year ago	
		Amount	%

Wage and Salary Employment			
All	+1.1%	+2.6%	+1.6%
Private Sector	+1.5%	+2.8%	+1.8%

Source: BLS

Wages and Salaries

Wages and salaries are expected to grow by 5.5 percent in FY 2005 and 5.2 percent during FY 2006, carrying forward the momentum of FY 2004. Wage growth has been stronger in the District than for the United States and compares favorably with that of the metropolitan area (see table 4-6). In FY 2005 and FY 2006, services are expected to account for 59 percent, and government 24 percent of the increase in wages.

Table 4-5

D.C. Real Estate Markets

The value of real estate is assumed to increase at a double digit rate in FY 2005 and FY 2006. The expected growth is not simply based on projecting the rapid gains of the past three years into the future. Analysis of the supply and demand factors present in the current market suggest these gains unless we experience an external shock, such as a sharp rise in interest rates.

Residential markets. Although the number of residential sales is expected to remain flat over the next several years, moderately rising interest rates are expected to have very little dampening effect on prices (see table 4-7). Gains in D.C. employment and wages, together with public

confidence about safety and street maintenance, make the D.C. location attractive for households that prefer not to be committed to a daily commute. Homeland security, outsourcing of government activities, and other changes to the federal government help fuel the demand for D.C. homes.

In FY 2004 price appreciation in the residential market was very strong, with average prices for single family homes and condominiums up 18.4 percent and 20.6 percent respectively. The total value of transactions increased by 21.9 percent and 34.0 percent, respectively. In the first five months of FY 2005, there was some evidence of slower growth in the number of sales. The

Total Value of transactions (\$M)	\$1,098.0	+\$86.1	+8.5%
Condominium			
Units Sold	1,586	+181	+12.9
Average price	\$376,319	+\$70,552	+23.1%
Median price	\$334,300	+\$60,527	+22.1%
Total Value of Transactions (\$M)	\$596.8	+\$167.2	+38.9%

Source: MRIS, accessed through the Greater Capital Area Association of Realtors, through February 2005 (median price is the average of monthly values).

condominium market has shown relatively more growth in sales activity and price appreciation than single family homes, accounting for two-thirds of the increase in the value of transactions in the first five months of FY 2005 from the same period of FY 2004 (see table 4-8).

The price appreciation in the residential market reflects high demand combined with limited supply. In CY 2004 there was an overall 5.9 percent decrease in single-family homes sold, while sales of single-family homes valued above \$300,000 rose 14 percent. In the condominium and cooperative subsector there was a 5 percent increase for all condominium homes sold and for condominiums valued above \$300,000, the increase was 56 percent.

Should the supply of housing increase significantly, this might moderate future price increases. However, the rate of new home construction is not expected to have much influence on the overall supply, and many of the new units will be at the upper end of the price range. Delta Associates reports that as of September 2004 there were 5,000 condominiums and 3,200 apartment units under construction in the District of Columbia, and approximately 4,750

additional new condominiums and 3,000 additional apartment units are likely to be built before 2007. However, new residential construction totals do not represent a net increase in the District's total housing stock due to demolitions and combining of several units into one. Without the needed-and unavailable-accounting of the total number of dwelling units, we have no definite assessment of the size of the city's housing stock.

Commercial real estate markets. The value of commercial property and the annual transactions in commercial property are forecast to grow in FY 2005 and FY 2006. The Washington area commercial market remains strong and attractive to investors from around the world. Many new buildings are under construction or in the active planning stage. Within the Metropolitan area and the nation, D.C.'s vacancy rates for commercial office space remain low (see table 4-9). All of these factors suggest that the commercial property market will remain lively.

Table 4-10 shows that in FY 2004 the inventory of commercial office space was up by 1.93 million square feet (1.8 percent) from the prior year; the vacancy rate (including space for sublet)

Table 4-9
D.C. Area Office Vacancy Rates

	D.C.	No. Virginia	Suburban MD	Metro
September 30, 2003	6.7%	14.4%	11.6%	11.2%
September 30, 2004	6.4%	11.4%	11.1%	9.7%

Source: Delta Associates (includes sublet space)

Table 4-10
Commercial Office Space in the District of Columbia
(Million square feet, unless otherwise indicated)

	Sept. 30, 2002	Sept. 30, 2003	Sept. 30, 2004
Inventory	106.44	109.29	111.22
Vacancy rate (no sublet)	4.8%	5.3%	5.4%
Vacancy rate (with sublet)	6.7%	6.7%	6.4%
Under construction	6.47	5.39	6.33
Net increase in leased space from prior year	+0.77	+2.17	+1.72

Source: Delta Associates

fell slightly to 6.4 percent (very low compared to the rest of the nation). The number of square feet sold (10.31 million square feet) increased by 19.6 percent, and the average price increased by 5.1 percent, resulting in a 26.2 percent increase in the value of transactions.

In FY 2004, the District was a top commercial office market in the nation as a result of a growing office tenant base comprised of the federal government, the legal sector and large associations. This tenant base has been a constant source of growth since 2001 for commercial office space demand and commercial real estate investment.

As of September 2004, the District was second in the nation with the most office space under construction, 5.7 million square feet. New York topped the list with 8.0 million square feet under construction. The District was also ranked second for the largest amount of net additional office space rented. Again, New York topped this list by adding 6.3 million square feet, while the District added 940,000 square feet. Despite adding a large amount of office space, there is no major concern of an over supply of office space because the District had the highest average quoted office rental rate of \$40.19 per square foot. New York ranked second with an average quoted office rental rate of \$39.34 per square foot. For the District, this indicates that the

demand for leased space, including new space under construction, is strong and growing. When these statistics are paired with stability of the tenant base, continued job growth, and the expanding economy, the District is likely to retain its designation as a top commercial real estate market in the nation.

Table 4-11
Labor Force, Resident Employment, and Unemployment in Quarter Ending December 31, 2004

Sector	Level	Change from one year ago	
		Amount	Percent
Labor force	300,900	+5,700	+1.9%
Resident employment	274,500	+100	+0.0%
Resident unemployment	26,400	+5,600	+27.2%
Unemployment rate	8.8%	+1.8%	--

Source: BLS

Population and D.C. Labor Market

The Financial Plan projects that population and resident employment will stabilize in FY 2005 and show sustained growth beginning in FY 2006. The projection is based in large measure on a judgment that housing construction and renovation, together with improvements in city services and amenities, will begin to increase population and resident employment.

The District's housing and employment markets are very active and, at some point, continued construction will result in a net increase in the District's housing stock and households, and probably population, labor force, and employed residents as well. Not enough is known to be sure when the transition will occur. We project that it is happening now and growth will be sustained by next year, but little is actually known about the dynamics of changes in the District's population, households (size and age distributions), housing stock (new units, units going out of existence), labor force, and resident employment. At present, the federal statistics available for the District make it difficult to make definitive judgments.

The U.S. Bureau of the Census shows, in a report dated December 2004, that the District's population is continuing to decline, down 18,536 (3.2 percent) from the 2000 Census, and down 53,368 (8.8 percent) since 1990. The population in the District of Columbia was 553,523 in July of 2004 as compared to the 2000 Census count of 572,059.

Longer Term (Fiscal Years 2007-2009)

In looking further ahead to FY 2007 to FY 2009, the consensus among forecasters of the U.S. economy is that steady, despite recent uptake in inflation, low-inflationary growth will continue, with accompanying gains in employment and wages and modest increases in interest rates. Absent any disturbances arising from the national economy, the regional economy is expected to show strength over the long term as it benefits from continued high levels of federal government expenditures for both national and homeland defense. The continuing revitalization of the

downtown area will draw metropolitan area residents to downtown restaurants, shops, and theaters. The new convention center that opened in FY 2003 should continue to boost the city's tourism industry, as will the addition of Major League Baseball in April 2005. The housing market is expected to remain strong as improving conditions in the city attract new residents, although the commercial real estate market may experience slower gains.

Revenues

The FY 2006 and revised FY 2005 estimates show General Fund revenues of \$4.758 billion and \$4.575 billion, respectively (see table 4-12). These amounts include local source General Purpose Tax, Non-Tax, and Special Purpose Revenues, and proposed policy changes affecting revenue. Also included among the revenue sources in Table 4-12 is the item "Additional Property and Sales Tax Revenue." The amounts for FY 2005 to FY 2009 are the additional property and sales tax revenues certified in May 2005 by the Office of the Chief Financial Officer. Analysis of recent tax collections data indicated that revenue from property and sales taxes will be greater than the revenue from these sources that is included in the February 2005 certified baseline revenue estimates. Table 4-12 reports estimated revenue by revenue source for the period FY 2005 to FY 2009, along with actual FY 2004 revenues. Table 4-13 provides estimates, over the same time period, of the fiscal impact on District revenues of those tax policies that were enacted in FY 2004.

Specific Revenue Sources

The income taxes account for 31.8 percent of estimated revenues in FY 2005, followed by 26.7 percent in property tax revenues, 19.0 percent in sales tax revenues, and 22.5 percent from all other sources (see figure 4-1). The Other Taxes include Deed Taxes (Deed Recordation, Deed Transfer, Economic Interest), and the Estate Tax. These revenue sources are discussed below.

Property Taxes

Real Property Tax

The District taxes real property based on 100 percent of assessed value and bills taxpayers twice annually like many other jurisdictions throughout the United States. The District, like many other jurisdictions, divides properties into three separate tax classes depending on the use of the real property. Each class is taxed at a different rate. The major difference, however, between the the District and other jurisdictions is the extraordinarily large proportion of real property that is exempt from paying the District's real property tax-amounting to roughly 57 percent by land area and 27 percent by total assessed value. Tax-exempt properties primarily include those owned by the federal government as well as properties owned by foreign governments, non-profit organizations, educational institutions, the District government, and others.

Real Property Tax Assessments

Annual Assessments

In FY 2004 all real property in the District was assessed on an annual basis, the first time since 1998. The District operated under a triennial assessment system from FY 1999 to FY 2003. The return to annual assessments means that assessed values are more representative of market values. But, the return to annual assessments, combined with rapid growth rates in market values, brought increases of 30 percent or more in tax liability for some properties. To ameliorate pressure on real property tax bills for residential tax payers, the Mayor and the Council enacted the Owner-Occupant Residential Tax Credit and Homestead Deduction Clarification Emergency Act of 2004. It stipulates that property taxes for District homeowners will increase no more than 12 percent annually and it increases the annual homestead deduction by \$8,000 to \$38,000.

In effect, the legislation lowers the tax liability of homestead property owners, particularly those whose property assessments experience annual growth in excess of 12 percent. The legislation does not limit the assessed value determined by the Office of Tax and Revenue.

Figure 4-1

FY 2005 Non-Dedicated General Fund Revenue

Real Property Tax Base

The value of all real property in the District grew 16.9 percent from \$93.8 billion in 2003 to \$109.7 billion in 2004. The total value of all taxable commercial properties amounted to \$33.7 billion or 30.8 percent of all property in the District. The total value of all residential properties amounted to \$32.7 billion or 29.8 percent of all property in the District. The total value of all exempt properties amounted to \$43.2 billion, 39.4 percent of all property in the District.

In 2004, the total value of taxable commercial properties grew 13.7 percent, taxable residential properties grew 15.2 percent, and all exempt property grew 21.0 percent from their levels in 2003. With only 60.6 percent of the value of all real property in the District being taxable in 2004, the commercial sector accounted for 50.8 percent of the 2004 tax base, down from 51.1 percent in 2003, and the residential sector accounted for 49.2 percent of the 2004 tax base, up from 48.9 percent in 2003. In FY 2004, the District's total taxable real property had an assessed value of \$66.4 billion. The Office of Tax and Revenue reports the average assessment for all taxable real properties in the city for 2005 grew by 14.6 percent.

Real Property Tax Rates

As mentioned earlier, the District's real property tax system divides properties into three separate tax classes depending on the use of the real property, and each class is taxed at a different rate (see table 4-14). Class 1 properties are residential properties, of which there are approximately 149,000. These properties are taxed at the residential rate of \$0.96 per \$100 of assessed value after applying the homestead deduction where appropriate. Class 2 properties are commercial properties, of which there are approximately 9,700. These properties are taxed at the commercial rate of \$1.85 per \$100 of assessed value. Class 3 properties are vacant and/or abandoned properties, of which there are approximately 3,300. These properties are taxed at a rate of \$5.00 per \$100 of assessed value. The significantly higher Class 3 tax rate is intended to prevent the proliferation of such properties, while simultaneously not being overly onerous for all potential Class 3 property owners. For example, Class 3 legislation provides a host of exemptions - 15 for residential property and 16 for commercial property - for buildings that are, for example, under construction, for sale, or have been damaged by flood or fire.

Real Property Revenue

In FY 2004, collections under the real property tax constituted 23 percent of General Fund revenue, making the real property tax the second largest source of General Fund revenue after the individual income tax. In FY 2005, real property tax revenue collections are expected to account for 25 percent of General Fund revenue. Real property tax revenue increased by 15.2 percent in FY 2004 over the prior year, and FY 2005 revenue is expected to increase 12.6 percent over FY 2004. These relatively high growth rates are the direct result of the enormously vibrant District real property market and the return to an annual assessment system.

The overall real property market in the District is expected to moderate back to its long term trend growth level by FY 2009. Afterwards real property tax collections are expected to grow at a more modest annual rate of 7 percent, which reflects the historical average annual growth in real property tax revenues in the District (see table 4-15 for all property tax revenue projections).

While the rate at which new District homes are being built in 2005 may be lower than in recent years, the level remains high. The U.S. Census Bureau reports that in the fourth quarter of 2004, there were more than 1,300 permits issued to build new housing units in the District. Furthermore, Delta Associates reports that as of September 2004 there were currently more than 5,000 condominiums and more than 3,200 apartments under construction in the District of Columbia, and approximately 4,750 additional new condominiums and more than 3,000 additional apartment units are likely to be built before 2007.

Due to the absence of comprehensive housing stock data, however, it is difficult to conclude that the District's housing stock has experienced sustained annual growth in recent years. This is

because new residential construction totals do not represent a net increase in the District's total housing stock. More specifically, there is an absence of reliable annual data for the total number of housing units demolished in the city. Furthermore, while the Office of Tax and Revenue (OTR) has a full accounting of the number of residential properties in the city, OTR does not have a full accounting of the total number of apartment units in the city. For example, in many cases, apartment buildings are considered one residential property for tax purposes. These factors preclude a definite assessment of the size of the city's housing stock.

The District's other major real property sub-sector is the commercial office market. The commercial office market accounts for more than 60 percent of real property tax collections and had a vacancy rate of 5.1 percent in the fourth quarter of CY 2004, among the lowest in the nation. By contrast, the District's commercial office vacancy rate was 5.6 percent in the fourth quarter of CY 2003. Moreover, for the second year in a row, the Association of Foreign Investors in Real Estate (AFIRE) ranked the District as the best city for commercial real estate investment for 2004 not only in the nation, but also the world (followed by London, Tokyo, New York and Paris).

Clearly, there continues to be a growing demand for the District's residential and commercial properties taking place in all parts of the city, and this is reflected in the fact that the average assessment for all taxable real properties in the city grew by 14.6 percent for 2005. When the several real property tax relief programs are accounted for, the real property tax revenue in 2005 is expected to grow by 12.6 percent over the real property tax collected in 2004.

Table 4-14

Real Property Tax Classes and Rates

Real Property Tax Class	Tax Rate
Class 1 (Residential)	\$0.96 per \$100 of assessed value
Class 2 (Commercial/Other)	\$1.85 per \$100 of assessed value
Class 3 (Vacant/Abandoned)	\$5.00 per \$100 of assessed value

Table 4-15

Property Tax Revenue

(\$ thousands)

Revenue Source	FY 2004 actual	FY 2005 revised	FY 2006 original	FY 2007 projected	FY 2008 projected	FY 2009 projected

General Obligation Bond - Debt Service

Each year the District dedicates a percentage of its real property tax collections to pay off the principal and interest on its General Obligation Bonds. For FY 2005, the percentage of real property tax collections dedicated to the repayment of principal and interest on the District's General Obligation Bonds is 45 percent.

Personal Property Tax

The District's personal property tax is levied on the depreciated value of all tangible personal property used in a trade or business, including computers, vehicles, plant and equipment but excluding inventories held for sale. The strength of the District's economy in recent years has resulted in greater investment in personal property used for commercial purposes.

In 2004 District legislation created a Neighborhood Investment Fund and a Neighborhood Investment Program which dedicates 15 percent (up to \$10 million annually) from personal property tax revenue to pay for a variety of community revitalization development purposes, including commercial, residential, and civic uses for twelve priority neighborhoods. With the initial implementation of this program in 2005, actual net personal property tax collections going to the General Fund will be 14.9 percent less in 2005. However, growth in actual net personal property tax collections going to the General Fund will commence in FY 2006 (see table 4-15).

Public Space Rental

There are three categories of public space rentals: sidewalks/surfaces, vaults and fuel tanks. Public space rental of sidewalks/surfaces includes enclosed cafes, unenclosed cafes, and merchan-

dise display areas (including used car lots). Vaults are underground areas that extend wider than an owner's property to spaces beneath the surface of public real property. For public space rental purposes, fuel oil tanks are areas used for tanks that hold heating fuel.

In FY 2001, total public space rental tax collection amounted to \$10.1 million. In FY 2002, collections increased 20.4 percent to \$12.2 million. This large increase in public space rental collections was the result of an enforcement initiative conducted in FY 2002 by the Office of the Deputy Mayor for Planning and Economic Development together with the District Department of Transportation as part of the Street Café Compliance Program. The program resulted in numerous District cafés paying past due taxes, fines and penalties because of previous noncompliance with District law. However, after the one-time spike in collections in 2002, revenues decreased by 3.4 percent to \$11.7 million in 2003. In 2004, revenues increased 42 percent to \$16.7 million. This increased amount resulted from a greater number of District businesses renting public spaces, but more importantly from the dramatically increased assessment values of underground vaults associated with large commercial office buildings. Like the personal property tax, the volatility in recent years' collections is the basis for modest annual growth from public space rentals for the next several years (see table 4-15).

Other Taxes

Deed Recordation and Deed Transfer Taxes

While the real property tax is an annual tax on all existing taxable properties in the District, deed taxes are levied only when taxable properties are sold. More specifically, the deed recordation tax is imposed on the recording of all deeds to real estate in the District, and the deed transfer tax is imposed on each transfer of real property at the time the deed is submitted for recordation. The deed recordation tax must also be paid on the increased value when commercial property is refinanced. Prior to FY 2003, deed recordation and deed transfer taxes were each calculated as 1.1 percent of the fair market value of every arms-length property sale.

Deed tax rates were affected by three legislative changes in FYs 2003 and 2004. First, the Deed Recordation Tax Amendment Act of 2002 increased both the deed recordation and deed transfer tax rates from 1.1 percent to 1.5 percent, effective January 1, 2003. Second, the Housing Production Trust Fund Second Amendment Act of 2002 requires that 15 percent of the District's deed recordation and transfer tax revenue be transferred to the Housing Production Trust Fund beginning in FY 2004. The Housing Production Trust Fund provides funds for the acquisition, construction and rehabilitation of affordable multifamily housing projects. And lastly, the Fiscal Year 2005 Budget Support Act of 2004 decreased both the deed recordation and deed transfer tax rates from 1.5 percent back to 1.1 percent, effective October 1, 2004.

In light of recent legislative changes, the following analysis of deed tax trends uses normalized deed tax collection data which nullifies the effect of the two tax rate changes in recent years so to extract and better understand the underlying economic activity that is captured by deed tax collections.

There are three component sources of deed tax revenue: the commercial real estate sector, the housing sector and commercial refinancing. In FY 2004, it is estimated that the commercial real estate sector accounted for 48 percent of total deed tax collections, the housing sector accounted for 37 percent, and the commercial refinancing sector accounted for 15 percent. Deed tax revenue from commercial property sales was 28 percent higher in 2004 than 2003, while deed tax revenue from residential property sales was 24 percent higher and commercial refinancing was 17 percent higher. Refinancing activity is measured by the difference between deed recordation and deed transfer taxes.

When the recent developments in the commercial and residential sectors are combined with the outlook for the next four years, it is expected that the deed recordation tax collections will grow by 26 percent, and the deed transfer tax collections will grow by 22 percent in FY 2005. However, the annual growth rates are expected to trend downwards for the forecast period resulting in a deed recordation tax collections growth rate of 14 percent and a deed transfer tax collections growth rate of 11 percent in FY 2009. This trend stems from the facts that job growth in the District will remain positive, but there is a scarcity of land on which to add housing in the District and continuously escalating sales prices will become even more prohibitive for potential District home buyers in the coming years. Despite the expected growth in the deed taxes in 2005, the Fiscal Year 2005 Budget Support Act of 2004, which decreased both the deed recordation and deed transfer tax rates from 1.5 percent back to 1.1 percent effective October 1, 2004, will cause net deed recordation collections for 2005 to be 6.7 percent less than the amount collected in 2004 due the deed tax rate reduction. Likewise, net deed transfer collections for 2005 are projected to be 9.5 percent less than the amount collected in 2004 due to the deed tax rate reduction.

Table 4-16

Value of Property Sold as a Percentage of Total Taxable Property

FY 1996	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001	FY 2002	FY 2003	FY 2004
5.41%	5.75%	8.97%	10.07%	9.38%	12.77%	10.76%	12.68%	14.53%

The strong demand for and limited supply of real estate in the District will continue to provide the key impetus for the growth in deed taxes from FY 2005 to FY 2009 (see table 4-17). This factor is reflected in the value of property sold as a percentage of total taxable property since 1996 (see table 4-16). In years 2001 to 2004, the percent of the District's property sold, in terms of value, was approximately double that in 1996. These statistics further support the view that the District is an attractive, as well as a profitable, place to own real estate and a desirable place to work and live.

Economic Interest Tax

The economic interest transfer tax is triggered by the sale of a controlling interest in a business entity that includes one or two of the following elements: 1) 80 percent or more of the assets of the entity consist of real property located in the District of Columbia; or 2) more than 50 percent of the gross receipts of the entity are derived from ownership or disposition of real property in the District. If either of these two elements is present, then the tax rate is 3.0 percent of the consideration. This tax is generally paid by real estate investment trusts and similar partnerships.

Economic interest transfers are normally very large and infrequent. There can be a long period of time leading up to the final payment of the economic interests tax, as corporate lawyers and the Recorder of Deeds determine exemptions and liabilities for the tax. Revenue from the economic interests tax increased from \$1.6 million in FY 2001 to \$5.1 million in FY 2002. But in spite of the Deed Recordation Tax Amendment Act of 2002, which increased the economic interests tax rate from 2.2 percent to 3.0 percent, FY 2003 economic activity subject to the economic interests tax slowed and tax revenue amounted to \$4.9 million in FY 2003. However, transactions subject to the economic interest tax in 2004 reached record proportions and revenue amounting to \$16.3 million was collected. This appears to be related to the heightened level of activity in the District's real property market, but prior years' collections are not entirely consistent with the level of activity in the District's real property mar-

ket in the same years. According to collections for the first quarter of 2005, economic interests tax collections in FY 2005 do not appear to be on track to rival 2004's record amount (see table 4-17 for out-year projections).

The Estate Tax

Prior to 2002, the District of Columbia piggy-backed on the federal estate tax system, using the federal "state death tax credit" as the starting point for the District's estate tax computation. Under this system, District taxpayers received a dollar-for-dollar credit against their federal estate tax payments for any estate tax due to the District of Columbia. District estate taxes, therefore, imposed no additional burden on decedent estates and did not increase the total estate tax payment beyond what would have been paid under federal law. This revenue-sharing approach provided for a system of uniformity across all states and the District of Columbia in the collection of death taxes. It resulted in minimal estate tax administration on the part of the District and minimized the impacts of "death shopping" to reduce estate taxes at death.

The federal Economic Growth and Tax Relief Reconciliation Act (EGTRRA) of 2001 changed this situation. This legislation gradually eliminates the federal estate tax over the next several years, with full repeal taking effect in year 2010. The major aspects of the EGTRRA legislation:

- Lowers tax rates for the largest estates;
- Raises the exemption level from \$650,000 to \$1 million in 2002, \$1.5 million in 2004, \$2 million in 2006, and \$3.5 million in 2009; and
- Lowers the state credit from 16 percent to 12 percent in 2002, 8 percent in 2003, and 4 percent in 2004. In 2005, the credit will be eliminated.

Existing District law, however, stipulates that the amount due to the District is the maximum credit for state death taxes allowed under Internal Revenue Code §2011, as it existed on January 1, 1986. This means that existing District estate tax laws are automatically decoupled from a few of the recent and forthcoming federal estate tax law changes. For example, while the federal threshold

was \$1 million, the District Inheritance and Estate Tax Act of 2002 raised the District's filing threshold from \$600,000 to \$675,000, effective January 1, 2002. The Estate and Inheritance Tax Clarification Temporary Act of 2004 raised the estate tax filing threshold from \$675,000 to \$1 million to decedents whose death occurs on or after January 1, 2003, while the federal threshold rises to \$1.5 million in 2004. Hence, some District estate tax payers may be required to file and pay District estate taxes even when no federal filing or tax is due.

From the Government of the District of Columbia's perspective, it is important to note that the current estate tax is primarily a federal tax that is overwhelmingly governed by complex federal legislation. The federal estate tax takes at least nine months to complete and practically compels affected decedent estates to hire lawyers to ensure compliance. Also, federal estate tax forms must be filled-out completely in order to calculate District estate tax liability, even when no federal estate tax is due but District estate tax is due. Essentially, the District does not have a stand-alone estate tax structure. District estate tax legislation is a diminutive appendage to a complicated set of unwieldy federal rules and regulations.

The District has attempted, however, on several occasions to minimize the impact of federal legislative changes that would adversely affect the level of estate tax revenues that are due to the District. But, the intent of the recent EGTRRA and the scope of legislation are designed to elim-

inate the federal estate tax (and consequently the District estate tax) by 2009. Therefore, no District legislative action, short of creating an entirely stand-alone estate tax system, will completely offset the effect of EGTRRA, which results in annually declining estate tax revenues at the federal and District levels.

Therefore, despite record level estate tax revenue in FY 2002, which was primarily the result of an unusually large estate tax payment, estate tax revenue was only \$29.9 million in FY 2003 and \$26.5 million in FY 2004, an 11.6 percent decrease. For the first four months of FY 2005, estate tax collections are down 36.3 percent compared to the same period in FY 2004. This continuous, but legislatively-induced decline in District estate tax revenues, is likely to continue through 2009. In FY 2005, the annual decline in estate tax revenue is expected to be 11.4 percent followed by an 8.6 percent decline in 2006 (see table 4-17).

Sales and Excise Taxes

General Sales and Use Tax

Revenue from the District's sales and use tax is collected using a five-tier structure. Sales of tangible personal property and certain specified services are taxed at 5.75 percent. Sales of alcoholic beverages for consumption outside the premises are taxed at 9 percent (increased January 1, 2003 from 8 percent). Sales of food and drink for immediate consumption, the rental or leasing of motor vehicles and sales of prepaid phone cards

Economic Interests	16,269	4,500	4,500	4,500	4,500	4,500
Total Other Taxes	329,004	291,716	330,364	372,252	418,174	466,970

are taxed at 10 percent (with one percent supporting the Convention Center Authority). Parking and storing of vehicles are taxed at 12 percent. Transient accommodations are taxed at 14.5 percent (with 4.45 percent supporting the Convention Center Authority).

From a policy perspective, the multiplicity of rates achieves many goals, including revenue generation from visitors to the District and support for the hospitality industry via the convention center transfer. Administratively, the multiplicity of rates, with special exemptions provided in each category, complicates the administration of the tax for the Office of Tax and Revenue and adds to compliance costs for businesses such as hotels and food stores, where transactions may involve several tax categories.

Revenue collected under the sales and use tax in FY 2004 was \$671 million, net of the Convention Center Transfer of \$62 million. For FY 2004, sales and use tax collections were the third largest source of District general fund revenue, comprising 17 percent of total local-source revenue. The sales and use tax applies to businesses on their purchases of supplies and equipment as well as to a wide range of ordinary consumer purchases.

Table 4-18 shows the distribution of the tax base and revenues for FY 2004 by tax type. General retail sales at a 5.75 percent rate accounted for about one half of the revenue. Two other categories - hotels (14.5 percent rate) and restaurants (10 percent rate) - make up the majority of the remaining revenue from the general sales tax. In FY 2004, out of the total \$733.2 million, \$671.0 million was deposited into the General Fund and \$62.2 million into the Convention Center Fund.

Revenue from the general sales tax (net of the Convention Center Transfer) grew strongly in the late 1990s. The average growth rate for FY 1998 through FY 2000 was above 5 percent. In FY 2001, growth slowed to about 3 percent, reflecting the general economic slowdown nationally and in the District. In FY 2002, sales tax revenue declined by 3 percent. The decline in FY 2002 was attributed to the District's hospitality industry suffering considerably because of the events of September 11. FY 2003 saw a modest recovery from the events of September 11; and this recovery continued in FY 2004 (annual sales and use tax revenue grew by 6.3 percent in FY 2004 from FY 2003). Collections from sales and use taxes are estimated to grow 12.0 percent for FY 2005. This growth is expected from: additional spending from the January 2005 presidential inauguration, the Convention Center being fully online, and the added spending from the ACC basketball tournament in March 2005.

The general U.S. economy grew at a rate of 6.6 percent in FY 2004 and a 5.7 percent rate is expected for FY 2005 (nominal GDP). U.S. personal income increased 6.6 percent in FY 2004 and is expected to increase 5.7 percent for FY 2005. When people have rising income they tend to spend a portion of this increase on vacation spending. Thus, the District is expected to see tourism spending, which picked up in FY 2004, continue to grow in FY 2005. This provides a basis for increased sales tax revenues for FY 2005. Also, the special events (i.e. ACC basketball tournament and presidential inauguration) occurring in FY 2005 provide an opportunity for tourism spending above the usual tourism draw. The growth rates in both

Table 4-18

Estimated Sales Tax Base and Collections by Tax Type, FY 2004

(\$ millions)

	Retail	Liquor	Restaurant	Parking	Hotel	Total
Base	6,182.6	192.2	1,866.0	267.5	977.2	9,485.6
Rate	5.75%	9.00%	10.00%	12.00%	14.50%	
Collections	355.5	17.3	186.6	32.1	141.7	733.2
Convention Center Transfer			18.7		43.5	62.2
General Fund	355.5	17.3	167.9	32.1	98.2	671.0

Table 4-19

General Sales and Use Tax Revenue

(\$ thousands)

	FY 2004 actual	FY 2005 revised	FY 2006 original	FY 2007 projected	FY 2008 projected	FY 2009 projected
General Sales and Use	671,017	751,780	806,000	857,666	902,333	949,322

sales tax revenue and personal income will slowly decline for the out years. We are expecting continuous positive growth from the hospitality industry, which will contribute to increases in sales tax revenue for the District over the next five years (see table 4-19).

Convention Center Transfer

After recovering from a FY 2002 drop, the convention center transfer grew by approximately \$4.6 million or 8.5 percent in FY 2003 over FY 2002. The convention center transfer continued its growth in FY 2004, expanding 5.6 percent from FY 2003; and we expect a 10.3 percent growth for FY 2005. This growth in the convention center transfer can be attributed to the facility being completely online in FY 2005 and the center's target occupancy rate of 75 percent for FY 2004 through FY 2006.

Restaurant Sales Tax

FY 2005 restaurant sales tax revenue is expected to be \$20.6 million and \$22.1 million in FY 2006, up 7.2 percent from FY 2005 (see table 4-20). The major force influencing this growth is the growth in hospitality spending, which is expected to be moderately increasing in FY 2005 and FY 2006.

Hotel Sales Tax

FY 2005 hotel sales tax revenue is estimated to be \$48.0 million; FY 2006 is forecasted to be \$51.5 million (see table 4-20). Again, hotel sales tax revenues are a sector of the District economy benefiting from the growth in tourism spending.

Selective Sales and Use Taxes

In addition to the multi-rate general sales and use tax, the District imposes excise taxes on alcoholic beverages, cigarettes, motor vehicles, and motor fuel. The motor fuel tax is deposited directly to a special account (the Highway Trust Fund) to match federal funds for the construction, repair and management of eligible District roadways. As a result, motor fuel tax revenue is not considered part of the general fund for budgetary purposes.

Alcoholic Beverage Tax

The alcoholic beverage tax is levied on wholesale sales of beer, wine, and liquor in the District. The tax rates vary by type of product. Alcohol consumption has been declining in the United States since 1990, a trend reflected in the District's tax collections for alcoholic beverages. Alcohol tax collections are expected to be \$4.7 million in FY 2006, a 7.8 percent decrease from FY 2004. Alcohol tax collections are expected to decrease moderately throughout the FY 2005 through FY 2009 projection period (see table 4-21).

Table 4-20

Total Selective Sales and Excise	66,292	68,911	70,129	71,444	72,860	74,380

Cigarette Tax

The cigarette tax is levied on the sale or possession of all cigarettes in the District with the exception of sales to the military and Congress. Cigarette consumption has been declining in recent years due to factors such as higher wholesale prices (related to the settlement between tobacco companies and the states), higher state taxes, and greater awareness of health risks. Effective January 2003, the cigarette tax rate increased to \$1.00 per pack, up from the previous rate of \$0.65 per pack. This rate increased FY 2003 revenues by \$4.2 million. FY 2004 revenues were \$20.8 million, a decline of \$0.6 million or 2.7 percent over FY 2003. Revenues are estimated to be \$20.9 million in FY 2006. We project revenue to decline 5 percent between FY 2007 and FY 2009 (see table 4-21).

Motor Vehicle Excise Tax

The motor vehicle excise tax is imposed on the issuance of every original and subsequent certificate of title on motor vehicles and trailers. The tax is 6 percent of fair market value for vehicles 3,499 pounds or less and 7 percent of fair market

value for vehicles 3,500 pounds and over. Collections from motor vehicle excise taxes totaled \$ 40.4 million in FY 2004, a 9 percent increase in collections from FY 2003. This tax is largely dependent on car purchases by District residents. Soaring car sales in previous fiscal years gave way to the fall-out from a slow economy following September 11. Automakers attempted to curtail this decline in FY 2002 by incentives such as zero percent financing and cash rebates. During FY 2003 many automakers still offered low interest rate financing. During FY 2003, auto sales seemed to recover from 9/11 levels. The District's Department of Motor Vehicles (DMV) has reported that there have been improvements in the administration of imposing the excise tax on all newly titled vehicles. The Department has programmed computers to ensure the application of the correct excise tax rate on a more consistent method of Fair Market Valuation. This improvement may have contributed to the increase in collections in FY 2004. Collections are projected to increase by 9 percent between FY 2007 and FY 2009 (see table 4-21).

Table 4-22

Income Tax Revenue

(\$ thousands)

	FY 2004 actual	FY 2005 revised	FY 2006 original	FY 2007 projected	FY 2008 projected	FY 2009 projected

Income Taxes

The individual income, the corporate franchise and the unincorporated business franchise taxes are significant sources of District tax revenue. Collectively, these taxes represent 32 percent of FY 2004 local source revenue. Revenue from these sources is summarized in table 4-22.

Individual Income Tax Base and Rate

The individual income tax, the District's largest single source of tax revenue, accounted for 26 percent of total local source revenue in FY 2004. The tax is levied on all individuals who maintain a permanent residence in the District at any time during the tax year and on those who maintain a residence for a total of 183 or more days. Individuals exempt from the District's personal income tax include: elected officers of the federal government; presidential appointees subject to confirmation by the U.S. Senate; justices of the United States Supreme Court not domiciled in the District; employees on legislative staffs who are bona fide residents of the state of their elected officer; and all persons working in the District but living outside the District. The tax is currently applied progressively to net taxable income as shown in Table 4-23.

These rates and estimates reflect the tax cuts under the revised Tax Parity Act of 1999, restarting in FY 2005. Originally, the Tax Parity Act of 1999 sought to reduce tax rates in the District of Columbia starting in FY 2000 and was to be fully implemented in FY 2004. However, it was temporarily suspended in FY 2003 and FY 2004 after the economic downturn that started in FY 2002. With the recovery of the District economy and revenues in FY

2004, the automatic triggers to restart were activated. For tax year 2005 the top rate has been reduced from 9.3 percent to 9.0 percent.

Going forward, one of three key triggers may prevent the other phases from being implemented. The first trigger states that the accumulated general fund balance for the immediately preceding fiscal year must be 5 percent of the general fund operating budget for the current fiscal year. The second trigger is that the estimated national economic growth rates published in the CBO's January report must exceed 3.5 percent on a nominal basis and 1.7 percent on a real basis. The third trigger requires that the Mayor demonstrate, and the Chief Financial Officer certify, that a proposed budget will not be balanced over the four year planning horizon of the financial plan. For FY 2006, the first two Tax Parity triggers have not been activated. The third trigger awaits the FY 2006 proposed Budget and Financial Plan.

FY 2004

In FY 2004, individual income tax revenue grew 12 percent. This was a remarkable turnaround from declines in the two previous years-it fell 14 percent in FY 2002 and a further 2 percent in FY 2003. The FY 2004 recovery in the individual income tax reflects a combination of strong growth in earnings of District residents as well as the stock market rebounding in the second half of FY 2003. Earnings of District residents grew roughly 6 percent in 2004 after growing only 2 percent the previous year. The withholding component of the individual income tax, which is tied directly to wages and salaries,

Table 4-23

Individual Income Tax Rates

Net Taxable Income	2005	2006*	2007*	2008*	2009*
\$0 - \$10,000	5.0%	4.5%	4.0%	4.0%	4.0%
\$10,001 - \$30,000	7.5%	7.0%	6.0%	6.0%	6.0%
\$30,001 - \$40,000*	9.0%	8.7%	6.0%	6.0%	6.0%
\$40,000 and above	9.0%	8.7%	8.5%	8.5%	8.5%

* If triggers permit.

grew 7 percent in FY 2004. The recovery of the stock market in the second half of 2003 also contributed significantly to the strong growth in individual income tax revenue in FY 2004. After a lackluster FY 2003 first half performance the stock market finished that year with 26 percent growth. The capital gains from the strong stock market performance boosted revenue from the declarations (estimated payments) and final payments components of the individual income tax. Declarations were up 15 percent over the previous year and final payments were up 26 percent. Overall, revenue from the individual income tax staged a strong recovery in FY 2004 and seems set to continue growing at a strong rate as recoveries in the national and local economies gain traction.

FY 2005-FY 2009

In FY 2005 the District expects \$1,113 million in individual income tax revenue, a 6.8 percent increase over FY 2004. With the Tax Parity tax cuts, the estimate is \$1,089 million, representing 4.4 percent growth. In FY 2006 the District expects \$1,183 million in individual income tax revenues, an 8.6 percent increase over FY 2005. After the tax cuts, the estimate is \$1,106 million with growth falling to 1.6 percent. For the period FY 2007 through 2009, we are estimating growth of between 5 and 6 percent in baseline individual income tax revenue. Note that in FY 2007, when Tax Parity is fully implemented, the after tax cuts growth rate is flat. After that individual income tax revenue grows in accordance with the baseline.

As the national and regional economies continue to strengthen and the District population becomes wealthier, as recent Census figures indicate, we expect continued strong revenue growth in the individual income tax. However, the individual income tax will continue to be a major source of volatility in the District's revenue system because its growth is so closely tied to the stock market. As the District's population becomes wealthier we also expect the volatility in this revenue source to increase as a greater share of taxable income will be tied to capital gains.

Corporate Franchise and Unincorporated Business Franchise Taxes

The District's franchise tax is imposed on all corporations and unincorporated businesses having nexus in the District of Columbia. The tax liability is determined by multiplying the rate of 9.975 percent (9.5 percent rate plus a surtax of 5 percent of the base rate) by the net taxable business income that is apportioned to the District of Columbia. Business income is apportioned to the District of Columbia based on a three-factor formula - sales, payroll, and property - with each factor weighted equally. When this apportionment formula does not fairly represent the extent of the taxpayer's business activities in the District, that taxpayer may petition for (or the Office of Tax and Revenue may require) consideration of a different formula.

Corporate franchise tax revenue as a share of total local fund revenues has declined as a percentage of total revenues from 5.4 percent in FY 1999 to 4.1 percent in FY 2004. Corporations have increasingly found methods to take deductions lowering their taxable income. As a result, many corporations, regardless of the amount of their gross profits, have only a minimum tax liability. This situation exists nationwide. Some state taxing authorities have attempted to disallow specific types of deductions through the courts (for example: *Geoffrey, Inc. v. South Carolina Tax Commission*). The District watches these cases with interest to learn about legal events and interpretations that may help to improve corporate franchise tax collections.

Corporate franchise tax revenue is a small share of total revenues both because approximately 65 percent of the District's corporate franchise taxpayers pay the minimum tax liability and because the minimum tax liability is \$100. The minimum amount remains unchanged since 1983. Growth rates of net incomes and taxes from them since 1983 are not reflected in minimum tax payments. Over the years, other categories of tax collections have therefore shown more growth when compared to the growth of corporate franchise tax collections.

Income from unincorporated businesses with annual gross receipts of \$12,000 or less is excluded from the tax base. Also excluded from the tax base is income from nonresident-owned unin-

corporated businesses that provide professional services (e.g. law firms). For taxable unincorporated businesses, owners are allowed a 30 percent salary allowance along with a \$5,000 exemption. When 80 percent or more of the entity's income is derived from personal services, the unincorporated business income is taxed under the individual income tax.

The Tax Parity Act enacted in 1999 was intended to reduce franchise tax rates from the current effective rate of 9.975 percent to 9.0 percent in FY 2003 and to 8.5 percent in FY 2004 and thereafter. These reductions were suspended in FY 2003 because of budget constraints. Franchise tax rates currently are 9.975 percent.

Corporate Franchise

The District estimates approximately \$196.2 million of corporate franchise tax revenue in FY 2005, a 16.6 percent increase over FY 2004, and revenue of \$ 196.1 million in FY 2006. We project growth of approximately 6.6 percent from FY 2007 to FY 2009. Our estimate is based partly on recent record growth in productivity, where corporations have been able to do more with fewer workers, and on the strong recovery of the stock market in the latter half of 2003; franchise tax revenues lag the stock market by about a year. We expect the growth in revenue from the corporate franchise tax to be less than the stock market's growth because the relationship between the stock market and corporate franchise tax is not one to one. In FY 2002 and FY 2003, legal rulings and changes to the applicable tax code resulted in larger refunds than expected. As a result, actual collections were less than estimated collections.

Unincorporated Business Franchise

The District estimates approximately \$95.3 million in unincorporated business franchise tax revenue in FY 2005 (an 8 percent increase over FY 2004), and \$103.3 million in FY 2006 (a growth rate of approximately 8.4 percent). We project growth of approximately 17.6 percent in FY 2007 through FY 2009. Collections from this revenue source, which are based on profits from unincorporated businesses located in the District, are linked to factors such as personal income growth, the local commercial real estate sector, and collections in the transfer and recordation taxes.

Many District unincorporated business tax filers who pay taxes on unincorporated business income are real estate investors. In FY 2003 and FY 2004 the real estate market in the District saw real estate investors' profits substantially increase from sales and leases of commercial and residential property. As a result, the strong growth in unincorporated business collections in FY 2003 and FY 2004 is largely due to the strong growth in the real estate industry in recent years. Although the industry is expected to remain strong, the growth rate is expected to slow somewhat during the FY 2006 to FY 2009 period.

Private contractors also pay the unincorporated business tax. As a result of increased federal contracting because of Homeland Security projects, we anticipate growth from this sector of unincorporated business filers to be strong. In addition, with an expected rebound in the stock market, we forecast strong growth in collections from unincorporated business in FY 2006 and the following years.

Gross Receipts Taxes

Taxes in this category include a tax of 10 percent on gross receipts of public utilities and toll-telecommunications companies operating in the District, a distribution tax of \$0.0077 per kilowatt-hour on electricity distributors, a 1.7 percent tax on the gross receipts of insurance companies, and a tax of 6 percent on nursing home providers. The rate on public utilities and toll telecommunication services changed effective January 1, 2005, triggered by revenue estimates in the summer of FY 2004. Rates were reduced back to 10 percent, the pre-January 2003 rate. Subsequent decisions supporting the Major League Baseball ballpark have re-established 11 percent as the rate only on non-residential users of public utilities and toll telecommunications services; revenue generated from this rate change will not be general fund revenue.

Companies that pay the gross receipts tax include heating oil companies, gas companies, electricity providers, subscription television, video and radio service providers, and telephone companies. The District taxes long distance and wireless telecommunications providers for the privilege of providing toll telecommunication service in District. Collections from this category of taxes are included in the "Toll Telecommunications Tax."

The District also taxes insurance premiums at a rate of 1.7 percent of gross premiums. Table 4-24 shows actual revenue in FY 2004, estimates for FY 2005 and FY 2006 and projected revenue from public utilities, toll telecommunications and insurance premiums for fiscal years 2007 through 2009.

Public Utility Taxes

The public utility tax is imposed on the gross receipts of gas, electric and local telephone companies. Washington Gas and Pepco are the leading suppliers of natural gas and electricity to customers in the Washington area. As a result of electricity deregulation, Pepco has lost some of its market share, but remains the dominant electricity distributor. Between September 2001 and September 2003, Pepco's market share declined from 97 percent to 88 percent. In homes and offices in the District, electricity is used more to cool and natural gas is used more to heat. Cold winters tend to result in an increase in collections from Washington Gas and hot, humid summers tend to result in higher collections from Pepco.

During FY 2003, as part of an effort to avert a potential budget shortfall, public utility tax rates were increased from 10 percent to 11 percent effective January 1, 2003. The legislation authorizing the rate increase included a trigger that restores the 10 percent rate "if the annual revenue estimate forecast in the fourth quarter of a fiscal year exceeds the annual revenue estimate incorporated in the approved financial and budget plan for that fiscal year by at least \$105 million."

The conditions to restore the 10 percent rate were met and the tax was lowered effective January 1, 2005. However, a charge of 1 percent was placed on gross receipts from utilities of non-residential customers effective January 1, 2005. The proceeds from this new charge will be dedicated to the baseball stadium funding.

In FY 2000, as part of the process of deregulation of the electricity market and Pepco's transformation from an electric power producer to an electric power distribution company, the District replaced the gross receipts tax imposed on electric utilities with a unit tax on electricity distribution companies. This "distribution" tax revenue is included with the city's gross receipts tax collections. The tax is imposed on electricity distributors who operate in the District. The tax rate was \$0.007 per kilowatt-hour. This rate was equivalent to the gross receipts tax at the time of conversion. Effective January 1, 2003, the rate was changed to \$0.0077 per kilowatt-hour. Because of the current tax structure, the tax collected is closely related to energy use. Therefore tax collections from electricity are more closely linked to weather extremes rather than to the fuel cost of the electricity. During the forecast period, we assume average weather patterns.

Fuel costs play a larger role in gross receipts revenues from natural gas use. Fuel costs have been extremely volatile in recent years. Washington Gas attempts to reduce price fluctuations by storing fuel and purchasing financial contracts for future supply

Table 4-24

Gross Receipts Tax Revenue

(\$ thousands)

Revenue	FY 2004 actual	FY 2005 revised	FY 2006 original	FY 2007 projected	FY 2008 projected	FY 2009 projected

<i>Baseball Gross Receipts Tax</i>	<i>0</i>	<i>(2,371)</i>	<i>(3,162)</i>	<i>(3,165)</i>	<i>(3,165)</i>	<i>(3,165)</i>
Toll Telecommunication (net)	54,951	47,321	45,852	45,676	45,699	45,719
Insurance Premiums	47,452	44,500	44,500	44,500	44,500	44,500
Healthcare Provider Tax	0	5,500	11,000	11,000	11,000	11,000
Total Gross Receipts Taxes	271,897	244,728	246,891	248,700	250,730	252,866

of fuel at a specified rate. For example, during the 2003/2004 winter, Washington Gas purchased and stored 35 percent of the natural gas the company expected to deliver during the winter. The company had also purchased an additional 12 percent of its normal winter supply through financial contracts.

We estimate revenue from public utilities taxes (net of the 1 percent charge to baseball stadium funding) to be \$147.4 million in FY 2005, and \$145.5 million in FY 2006. Revenue from public utility taxes is estimated to grow modestly at 2.8 percent from FY 2007 through FY 2009.

Toll Telecommunication Taxes

The toll telecommunications tax is levied on long distance and wireless telecommunications companies for the privilege of providing toll telecommunication service in the District. In the first quarter of FY 2003, the tax rate was 10 percent. During FY 2003, as part of an effort to avert a potential budget shortfall, public utility tax rates increased from 10 percent to 11 percent effective January 1, 2003. The legislation authorizing the rate increase included a trigger that restores the 10 percent rate "if the annual revenue estimate forecast in the fourth quarter of a fiscal year exceeds the annual revenue estimate incorporated in the approved financial and budget plan for that fiscal year by at least \$105 million."

The conditions to restore the 10 percent rate were met and the tax was lowered effective January 1, 2005. However, a charge of 1 percent was placed on gross receipts from toll telecommunications effective January 1, 2005. The proceeds from this new charge will be dedicated to the baseball stadium funding.

Effective August 2002, the District enacted legislation to conform to the federal Mobile Telecommunications Sourcing Act (MTSA). The legislation simplifies the billing process and ensures that calls from mobile phones are not subject to multiple taxation. The legislation defines and designates a user's place of primary use (PPU) as either the user's residence or business address. The District both lost and gained revenue as a result. Some cell phone users who use their cell phones in the District and thus used to pay D.C. taxes on their long distance calls,

selected the District as their PPU and some cell phone users selected other jurisdictions.

The telecommunications industry has faced difficult challenges in recent years. Changes in regulation, overcapacity of lines, and stiff competition to long distance providers (such as AT&T, MCI, Sprint) by local telephone companies such as Verizon are among these challenges. Long distance providers are also suffering because of the growth of the wireless telephone industry. Most wireless telephone companies now include inexpensive long-distance calling plans as a standard feature.

We expect the capacity of local lines to be reduced in the coming years. We also expect the telecommunications sector to recover at a moderate pace. We estimate revenue from the toll telecommunications tax (net of the 1 percent charge to baseball stadium funding) to be \$47.3 million in FY 2005 and \$45.9 million in FY 2006. We project revenue to be flat from FY 2007 through FY 2009.

Insurance Premiums Tax

The District's insurance premiums tax rate is 1.7 percent of gross premium receipts. Annuities are tax-exempt. The insurance premiums tax is levied on insurance policies taken out by District residents as well as on property that is registered in the District, regardless of where the policies are written or initiated. Approximately 50 percent of the revenue from the insurance premiums tax comes from life insurance policies, with other premiums (including business, health, property and motor vehicle) making up the other half. Since September 11 insurance rates have risen nationally. Insurers had begun to either substantially increase the price for terrorism coverage or drop the coverage completely. However, District regulators reached an agreement that would cap premium increases for terrorism coverage at 24 percent.

Insurance costs have also risen in recent years with the declining stock market. Investments that had previously helped offset underwriting losses for many insurance companies have turned into losses themselves. As a result of the increased premium charges and the reduction in insurance investment income, premiums rose by \$6.2 million or 15

percent in FY 2004. Collections from taxes on insurance premiums are estimated to remain stable at \$44.5 million in FY 2005 to FY 2009 unless there is another external jolt to the insurance industry.

Healthcare Provider Tax

The healthcare provider tax imposes a 6 percent tax on the District's nursing homes. The tax should be implemented mid FY 2005 and is estimated to generate \$5.5 million in general fund revenue in FY 2005 and \$11 million in FY 2006 through FY 2009.

Non-Tax Revenues

General Purpose Non-Tax Revenue

Total general purpose non-tax collections are estimated to be \$331.0 million in FY 2005 (see table 4-25). This is \$7.3 million or 2.2 percent greater than FY 2004 estimated non-tax revenue collections. Factors contributing to this increase in general purpose non-tax revenue in FY 2005 include the following:

Collections from business licenses and permits are estimated to be 12.3 percent higher than FY 2004 actual revenues. This is due to the fact that some insurance licenses are renewed every other year, creating a cyclical trend in annual collections.

Collections from fines and forfeitures are estimated to be 10.6 percent greater in FY 2005 than in FY 2004 due to a \$11.2 million increase in photo radar enforcement collections in FY 2005.

Collections from charges for services are estimated to be 7.4 percent higher in FY 2005 than in FY 2004 due to a \$1.6 million increase in other service charges, a \$1.7 million increase in corporate recordation, and a \$2.3 million increase in parking meter collections in FY 2005.

Collections from miscellaneous revenues are estimated to be 24.8 percent lower in FY 2005 than in FY 2004 due to a \$1.4 million decrease in WASA-Pilot, a \$5.6 million decrease in unclaimed property, a \$16.6 million decrease in USMS reimbursements, and an \$12.6 million decrease in other revenue collections in FY 2005.

Special Purpose Non-Tax Revenue

Special purpose non-tax revenues, often times referred to as O-Type or Other revenues, are funds generated from fees, fines, assessments, or reimbursements that are dedicated to the District agency that collects the revenues to cover the cost of performing the function. The "dedication" of the revenue to the collecting agency is what distinguishes this revenue from the general-purpose non-tax revenues. The legislation that creates the fee, fine or assessment must stipulate its purpose-designation and must also state whether any unspent funds are to retain designation at the conclusion of the fiscal year or revert to general-purpose funds. Unspent revenue in certain funds cannot revert to general purpose funds. It is the policy of the District government to discourage the allocation of dedicated revenue directly to agencies. Dedicated revenues limit the use of the District's General Fund revenue by earmarking a portion of the revenue for special purposes. Prior to FY 2002 dedicated non-tax revenues were not considered local revenues and as such were reported differently in the Comprehensive Annual Financial Report (CAFR) and reported with the District's federal and private grants in the Financial Plan.

In FY 2006 the District is anticipating \$264.3 million in revenue and use of fund balance of \$124.7 million for a total of \$389.0 million to cover the cost of performing the functions associated with these resources. The use of fund balance is a one-time revenue source and as such is not projected for future years. Table 4-31 (at the end of this chapter) shows the dedicated non-tax revenue by source.

Special Funds and Earmarked Revenues. District of Columbia revenues include both special funds and earmarking of General Fund revenues.

Special Funds

The District operates several special funds financed by tax revenues, including the Convention Center Fund and the Highway Trust Fund. These revenues are not available to the general fund and the Appropriated Budget.

Convention Center Fund. Beginning in FY 1999, the formula financing the Convention Center Fund includes only sales tax revenue from hotels, restaurants, rental vehicles, and sales of pre-paid phone cards. Prior to FY 1999, revenues from a 5 percent surtax on franchise taxes and a \$1.50 tax on each hotel room-night were dedicated to the Convention Center Fund. These funding sources were eliminated and replaced by a larger share of the hotel sales tax dedicated to that purpose. The hotel tax rate is 14.5 percent - a 4.45 percent rate dedicated to the Convention Center Fund and a 10.05 percent rate to the District's general fund. The 10 percent restaurant sales tax is divided so there is a 1 percent rate that is dedicated to the Convention Center Fund and a 9 percent rate to the General Fund.

Highway Trust Fund. The motor fuel tax is assessed at \$0.20 per gallon. Motor vehicle fuel tax revenue is deposited directly into a special account, the Highway Trust Fund, and is not general fund revenue. The Highway Trust Fund uses both local-source and federal matching funds to construct, repair and manage eligible District roads and bridges. Approximately 400 of the 1,020 miles (or 39.2 percent) of streets and highways, as well as 229 bridges in the District, are eligible for federal aid.

The motor fuel tax is levied on fuel wholesalers, and yearly variations in tax collections are primarily a function of fuel consumption. In the past, revenues averaged approximately \$30 million a year. With the forecast for the local economy improving, revenues are projected to amount to \$26.7 million in FY 2005. Based on a time series analysis of recent trends in relation to the local economy, fuel tax revenues are forecasted to grow approximately 1.0 percent per year beginning in FY 2005. This is generally consistent with the U.S. Energy Information Agency forecasts for national gasoline demand. These latter forecasts attribute growth in fuel demand to an accelerating U.S. economy (particularly from the commercial sector) and decreases in the improvement in vehicle fuel efficiency (see table 4-26).

Policy Proposals

The Fiscal Year 2006 Budget Support Act of 2005 includes a number of policy proposals that affect District of Columbia revenues:

- Increase the standard deduction to \$2,500;
- Increase the personal exemption to \$1,500;
- Expand the local EITC match;
- Extend EITC benefits to non-custodial parents;
- Establish a new Office of Tax and Revenue special purpose revenue fund for collection fees assessed against delinquent taxpayers;
- Increase the homestead deduction to \$60,000;
- Provide property tax deferral to low income residents;
- Establish a new fee collection incentive fund;
- Provide tax exemptions for:
 - the Catholic University of America's Soldiers' and Airmen's Home,
 - the Carver 2000 Low Income and Senior Housing Project,
 - the Dupont Commons Low Income Housing Project,
 - the Way of the Cross Church of Christ,
 - the Board of Trustees of the Endowment Fund of Appalachian State University,
 - property recordation and transfers between grandparents and grandchildren,
 - APA 750 LLC, a wholly owned subsidiary of the American Psychological Association,
 - recyclable materials removed during exterior and interior trash removal;
- Establish a calculated residential property tax rate;
- Transfer U.S. Marshals reimbursement to a Department of Corrections' special purpose revenue fund;
- Increase parking fines;
- Create a new DDOT special purpose revenue fund from the following revenue streams:
 - public space rental,

- parking meters.

- Transfer parking tax revenue to DDOT's Local Streets Maintenance fund.

Increase the Standard Deduction to \$2,500

The District's current standard deduction is \$2,000 (\$1,000 a married person filing separately). This proposal would increase the standard deduction to \$2,500 (\$1,250 for a married person filing separately). Tax relief from this proposal would go to an income tax filer who takes the standard deduction. The benefit from the increased standard deduction primarily accrues to low income residents and residents that do not own homes. The increase would bring the District's standard deduction closer to those of Virginia, Maryland, and the federal government. This proposal would reduce tax revenue by approximately \$3.4 million in FY 2006.

Increase the Personal Exemption to \$1,500

The District's current personal exemption is \$1,370 per person. This proposal would increase the personal exemption to \$1,500. This proposal brings the District to 2/3 of the Maryland personal exemption level and well above Virginia's personal exemption level. Tax relief goes to all income tax filers. More benefits accrue to those income tax filers with multiple dependents. This proposal would reduce tax revenue by approximately \$3.5 million in FY 2006.

Expand Local EITC Match to 35 Percent

The District currently offers a refundable 25 percent match to the federal Earned Income Tax Credit (EITC) program. Under this proposal, the District will supplement this refundable match with a non-refundable credit up to 35 percent of the federal level. This refundable credit would make D.C.'s EITC similar to Maryland's program where 15 percent is refundable and 50 percent is non-refundable. The vast majority of benefits would go to low income households with children; low income households without children would also receive some benefit from this policy change. This proposal would reduce tax revenue by approximately \$7.1 million in FY 2006.

Extend EITC Benefits to Non-Custodial Parents

This proposal extends EITC tax relief to non-custodial parents - primarily unmarried fathers - who pay child support and who meet certain other eligibility criteria. This proposal would reduce tax revenue by \$300,000 in FY 2006.

New Delinquent Taxpayer Collection Fees and Special Purpose Revenue Fund

This proposal would create a new special purpose revenue fund within the Office of the Chief Financial Officer. This proposal allows the Office of Tax and Revenue (OTR) to recover costs associated with pursuing collection of delinquent tax balances, placing real property delinquencies through the tax sale process, and handling installment agreements. Revenue for this fund would be generated through newly established collection fees. In FY 2006, this proposal would result in approximately \$3.8 million of revenue for the new special purpose revenue fund.

Increase the Homestead Deduction to \$60,000

This proposal increases the amount that is deducted from a homeowner's property tax assessment from \$38,000 to \$60,000. This proposal provides a \$211 benefit to all homeowners across the city. This proposal would reduce tax revenue by \$18.7 million in FY 2006.

Low Income Property Tax Deferral

This proposal freezes real property tax liability for residents with incomes of \$50,000 or less. Any incremental tax liability will be paid out of his or her estate upon sale or estate settlement. Benefits accrue to low income residents who may have trouble affording the rising property taxes on their properties. This proposal would reduce tax revenue by \$2.0 million in FY 2006.

Fee Collection Incentive

A Fee Collection Incentive Fund, which is to be separate from the District's General Fund, will be established. At the beginning of each fiscal year, five percent of supplementary revenue collected in

the base year (i.e., prior fiscal year) by any District agency involved in the collection of fees or fines on behalf of the District (except the Office of the Chief Financial Officer) will be deposited in the fund in an account established for the agency. Supplementary revenue means the amount of revenue from all fees and fines collected by an agency in the base year that exceeds the estimate of revenue from fees and fines for the agency in the base year budget and financial plan. Fees and fines include all collections subject to general appropriations, but do not include funds which are earmarked for special purposes and accounted for or deposited in a special fund for such purposes (i.e., Special Purpose Revenue fund). The funds in the agency account may be expended for any authorized use in the fiscal year; provided, that the funds shall not be used by the agency for employee bonuses, and provided that the expenditure of funds shall directly enhance the agency's efficiency. This proposal would increase non-tax revenue by approximately \$1.3 million in FY 2006.

Catholic University of America Real Property Tax Exemption

Under this proposal, The Catholic University of America's Soldiers' and Airmen's Home located in the Northeast quadrant of the District of Columbia and comprising approximately 49 acres of land, together with the improvements thereon and owned by The Catholic University of America shall be exempt from all taxation so long as it is owned and planned for use by, or actually used by, The Catholic University of America for its purposes and activities, and is not used for commercial purposes. This exemption is estimated to reduce revenue by \$1.0 million in FY 2006.

Carver 2000 Low Income and Senior Housing Project Tax Exemptions

The "Carver 2000 Low Income and Senior Housing Project" refers to the financing, refinancing, or reimbursing of costs incurred for the acquisition, development, construction, installation, and equipping of the mixed-use 176 units of apartment and town homes for senior citizens and low income residents of the District of Columbia, located in various lots and squares; and consisting of: (1) land and improvements that are to be ren-

ovated into approximately 176 units of apartments and town homes for senior citizens and low income families; and (2) all common areas and ancillary improvements identified in any pre-existing financing agreements supporting the development of low income and senior housing in the lots and squares identified in this subtitle. This project shall be exempt from deed recordation and transfer taxes, sales taxes, and real property taxes imposed under various sections of the D.C. Official Code. In FY 2006, these exemptions are estimated to reduce revenue by \$50,000.

Dupont Commons Low Income Housing Tax Exemption

This proposal amends the D.C. Official Code such that: (A) Any nonprofit organization that has been denied exemption from D.C. real property taxes pursuant to D.C. Official Code §47-1002 and has acquired property to develop more than 10 units of housing for affordable or lower income homeownership households in the District of Columbia and subdivides the acquired property into more than 10 units shall have 2 years from the date of the subdivision of the property to hold the property without liability for the recordation, transfer or real property taxes associated with the acquisition and development of the property for low income or affordable housing; (B) All recordation, transfer and real property tax assessments associated with the acquisition of properties under subsection (A) shall not be assessed against a nonprofit organization that acquires property and subdivides it for resale into more than 10 units to low income home owners when the first low income home owner purchases a home within two years of the subdivision of the property; (C) No recordation and transfer taxes shall be assessed upon the acquisition of property by a nonprofit organization subject to subsection (A) that subdivides the property into more than 10 units of low income housing and completes the sale of all units of low income housing on the property within 4 years from the date of acquisition. This tax exemption is estimated to reduce revenue by \$100,000 in FY 2006.

Way of the Cross Church of Christ Real Property Tax Exemption

This proposal amends the D.C. Official Code such that the Way of the Cross Church of Christ's real property located at various lots in square 5730 shall be exempt from all taxation so long as the this property is owned by the Way of the Cross Church of Christ and the property located on square 5730, lot 918 is used as the principal residence of the pastor of the church. In FY 2006, this tax exemption is estimated to reduce revenue by \$10,000.

Appalachian State University Real Property Tax Exemption

This proposal amends the D.C. Official Code so that property located in the Southeast quadrant of the District of Columbia, comprising land together with the improvements thereon, and owned by The Board of Trustees of the Endowment Fund of Appalachian State University shall be exempt from all taxation so long as it is owned by The Board of Trustees of the Endowment Fund of Appalachian State University and planned for use by the Appalachian State University for its purposes and activities, and is not used for commercial purposes. In FY 2006, this tax exemption is estimated to reduce revenue by \$20,000.

Family Property Recordation and Transfer Tax Exemption

This proposal amends sections of the D.C. Official Code addressing property transfers exempt from the recordation tax on deeds and the transfer tax on real property. The amendment extends coverage to include deeds and transfers between a grandparent and a grandchild. Currently, deeds and transfers between a husband and a wife, a parent and a child, and domestic partners are exempt from these taxes. This exemption is estimated to reduce revenue by \$44,000 in FY 2006.

American Psychological Association Partial Real Property Tax Exemption Continuation

Under this proposal, the D.C. Official Code is amended such that real estate in the District of Columbia (lot 146, square 677), and the buildings located thereon, owned by the APA 750 LLC, a wholly owned subsidiary of the American Psychological Association, a District of Columbia nonprofit corporation, will be exempt from taxation for that portion of property owned by APA 750 LLC and occupied and used by the American Psychological Association to the extent that the property continues to be so owned and occupied, and not used for commercial purposes. In FY 2006, this tax exemption is estimated to reduce revenue by \$940,000.

Recyclable Material Sales Tax Clarification

This proposal amends the D.C. Official Code by exempting charges for the removal of recyclable material from the gross sales tax that is presently assessed on charges for real property maintenance involving exterior and interior trash removal. In FY 2006, this tax exemption is estimated to reduce revenue by \$373,000.

Calculated Residential Property Tax Rate Establishment

This proposal amends the D.C. Official Code to provide for the annual calculation of the real property tax rate for Class 1 properties as follows:

- Before September 16, 2006, the Mayor shall submit to the Council the real property tax rate calculated to yield in the tax year the same amount of gross taxes on assessments as was raised during the preceding tax year, plus 9 percent.
- Before September 16, 2007, the Mayor shall submit to the Council the real property tax rate calculated to yield in the tax year the same amount of gross taxes on assessments as was raised during the preceding tax year, plus 8.7 percent.
- After 2007, before September 16th of each year, the Mayor shall submit to the Council the real property tax rate calculated to yield in the tax year the same amount of gross taxes on assessments as was raised during the preceding tax year, plus 8 percent.

Since the calculated tax rates are contingent upon the specified conditions, projected revenues from this proposal have not been estimated.

Transfer U.S. Marshal's Reimbursement to New DOC Special Purpose Revenue Fund

Under this proposal, a new Department of Corrections (DOC) special purpose revenue fund would be created. This proposal would have no net effect on District revenues since it merely redirects the reimbursement the District currently receives from the U.S. Marshal's Service to a new special purpose revenue fund. Currently, the revenue from these sources is considered non-dedicated general fund revenue. In FY 2006, this proposal would result in approximately \$25.1 million of revenue flowing into the new DOC special purpose revenue fund.

Parking Fines Increase

This proposal amends the D.C. Municipal Regulations (DCMR) to increase fines for the following parking infractions:

- Overtime parking at a meter,
- Overtime parking in a time zone restricted by posted sign,
- Not parked in a meter space,
- Parking within 25 feet of a stop sign,
- Parking in a bus stand or zone,
- Parking in an official parking permit space,
- Parking in a government vehicles only space,
- Parking in a motorcycle parking only space, and
- Parking in an emergency no parking space.

This proposal would increase non-tax revenue by approximately \$1.3 million in FY 2006.

Transfer Certain Tax and Non-Tax Revenue to DDOT Revenue Funds

Under this proposal, a new special purpose revenue fund would be created for the District Department of Transportation (DDOT). This proposal would have no net effect on District revenues since it merely redirects revenue from certain existing revenue sources to a new special

purpose revenue fund. Currently, the revenue from these sources is considered non-dedicated general fund revenue. The revenue streams affected by this proposal are: public space rental revenue and parking meter revenue. In FY 2006, this proposal would result in approximately \$29.3 million of revenue being placed in the new DDOT special purpose revenue fund.

Additionally, the proposal would transfer the non-dedicated parking tax revenue stream out of the general fund to DDOT capital projects. In FY 2006, this proposal would transfer \$30 million.

Notes on the Data and the Revenue Estimates

In the tables and estimates contained in this chapter, actual revenues are reported for FY 2004, estimated revenue for FY 2005-2006, and projected revenues for FY 2007-2009. Actual revenues correspond to amounts that are reported in the Comprehensive Annual Financial Report (CAFR) for FY 2004. The Office of Revenue Analysis (ORA) prepares the estimates and projections based on current law, policy, and administrative quality. No changes in tax structure, tax rates, or addition or elimination of revenue sources are included as part of the estimate unless already legislated and able to be implemented.

Procedures for Estimating Revenue

The process of estimating revenue begins a year in advance. The estimates for FY 2006, for instance, were begun in September 2004.

In September we issue a revenue call to all agencies requesting reports and projections on the amount of user fees, fines, and other types of non-tax income agencies expect to generate.

Economic forecasting assumptions for the District are received from two nationally known economic analysis and forecasting firms, Global Insight, Inc. (formerly DRI-WEFA) and Economy.com, in late summer or late fall. These assumptions help us build the base for growth over the forecast horizon.

During the late summer and throughout the fall, analysts maintain contact with people throughout the District government who are knowledgeable of the collection of all tax and

non-tax revenues. This includes the Office of Tax and Revenue and agencies that have user fees or that impose fines. This gives us a good feel for progress in meeting the current year's goals and for understanding likely trends in the near future.

Analysts follow the year-end closing to be aware of accounting issues that might affect revenues - for instance, changes in accounts receivable or reserves that might impact revenue numbers.

Two advisory groups help us understand the economy:

- The first, a technical advisory group, meets in December and June and is composed of experts in revenue forecasting. Membership includes representatives from the Congressional Budget Office (CBO), the Richmond Federal Reserve, the Commonwealth of Virginia, the State of Maryland, and other jurisdictions and related organizations.
- The second advisory group, composed of knowledgeable local business representatives, advises us about current economic trends and helps us understand where the private sector thinks things are heading. This group meets with us in January and July. Members of this group represent the hotel and tourism industry, real estate and housing, banking and finance, neighborhood groups, downtown development interests, the education sector, and other interests.

Updated economic assumptions are received from forecasting firms in January. This allows us to fine-tune our projections based on the most recent data available before the final forecasts are released.

At the end of January, CBO releases its Winter Report. This provides recent and valuable guidance on where the national economy is expected to go over the next ten years. As the national economy has a great deal of impact on the D.C. economy, this report is a valuable tool in the final stages of the revenue estimation process.

Subsequent steps in revenue estimating are part technical and part investigative.

The technical part of revenue estimating involves using econometric methods to find sta-

tistically valid models that replicate past collections and project confidence intervals for future collections. The models use explanatory variables to account for revenue collections over time relying on relationships between (a) the money collected by the District in a given tax type, and (b) economic variables that track the underlying tax base. For example, in the unincorporated business tax, one model shows a strong lagged relationship between employment in construction and activity in the real estate market (as measured by collections in the transfer tax). This makes sense given that much of the activity that is taxed by the unincorporated business franchise tax is in the real estate and construction segments of the D.C. economy. The economic forecasting variables are used directly in these methodologies.

The rest of the process is where the investigating comes into play. The next step is to incorporate the revenue impact of legislation and additional factors that cannot be captured by econometric models. For instance, when we were developing revenue projections prior to the opening of the new convention center we knew there would be an impact in the amount of revenue generated by the sales tax, particularly at the restaurant and hotel sales tax rates. No econometric model can capture this impact. However, an estimate of the impact must be included in our revenue projections.

The final step is to run a reality check on the numbers produced. To do this, we compare the projected trends with those of the Congressional Budget Office and neighboring jurisdictions. If

our projections are substantially different for individual income tax collections than what CBO is projecting, for example, we need to explain the difference. This helps ensure that our understanding and knowledge of the fundamentals of a tax type are consistent with those of other professionals in the field. The pattern of changes over the projection horizon is also scrutinized in this phase of the process. A dramatic jump or drop from one period to the next needs to be understood.

For the FY 2003 estimates, we contracted with KPMG to review our data and estimating methodologies, determine whether the methodologies are correctly implemented, and recommend changes where they find areas of weakness. Overall, they concluded that ORA uses sound methodologies and implements them competently. They also found that the greatest cause of uncertainty in the estimates is the quality of the data.

Additional Information on D.C. Revenues

Table 4-27 through 4-31 provide additional detail on what the District taxes and collects, at what rates, and how much revenue these taxes and non-tax revenues yield. Table 4-32 identifies legislation enacted in FY 2004 and FY 2005 that was passed subject to inclusion in the budget and financial plan. All legislation included in this table is accounted for in the FY 2006 Proposed Budget and Financial Plan.

Table 4-29

Summary of Major Taxes in the District of Columbia, Fiscal Year 2005

PART A—GENERAL FUND TAXES

TAX	DESCRIPTION OF WHAT IS TAXED	RATE	FY 2004 REVENUE								
REAL PROPERTY TAX	All real property, unless expressly exempted, is subject to the real property tax and is assessed at 100% of market value. With the property tax year beginning October 1, 2002, the District of Columbia increased the number of property classes from two to the following three classifications of property: Class 1--improved residential real property that is occupied and is used exclusively for nontransient residential dwelling purposes; Class 2--commercial property; and Class 3 - unimproved or abandoned property. <i>D.C. Code Citation: Title 47, Chapters 7 - 14.</i> The District's Real Property Tax Year is October 1 through September 30.	<table border="1"> <thead> <tr> <th>Property Class</th> <th>Tax Per \$100 of Value</th> </tr> </thead> <tbody> <tr> <td>Class 1</td> <td>\$0.96 (*)</td> </tr> <tr> <td>Class 2</td> <td>\$1.85</td> </tr> <tr> <td>Class 3</td> <td>\$5.00</td> </tr> </tbody> </table> <p>(*) For owner-occupied residential real property, the first \$38,000 of Assessed Value is exempt from the tax.</p>	Property Class	Tax Per \$100 of Value	Class 1	\$0.96 (*)	Class 2	\$1.85	Class 3	\$5.00	\$ 947,689,000
Property Class	Tax Per \$100 of Value										
Class 1	\$0.96 (*)										
Class 2	\$1.85										
Class 3	\$5.00										
PERSONAL PROPERTY TAX	All tangible property, except inventories, used or available for use in a trade or business. <i>D.C. Code Citation: Title 47, Chapter 15.</i>	\$3.40 per \$100 of assessed value Note: As of July 31, 2000, both an accelerated depreciation schedule for computer equipment; and a \$50,000 taxable value threshold on personal property are adopted.	\$ 63,558,000								
PUBLIC SPACE RENTAL	Commercial use of publicly owned property between the property line and the street. <i>D.C. Code Citation: Title 10, Chapter 11.</i>	Various rates for the following: Vault, Sidewalk (Enclosed and Unenclosed Cafes), Surface, and Fuel Oil Tank	\$ 16,728,000								
SALES AND USE TAX	All tangible personal property and certain selected services, sold or rented to businesses or individuals at retail in the District. Groceries, prescription and non-prescription drugs, and residential utility services are among those items exempt from the sales tax. The use tax is imposed at the same rate as the sales tax rate on purchases made outside the District and then brought into the District to be used, stored or consumed, providing that the purchaser has not paid the sales tax on the purchases to another jurisdiction. <i>D.C. Code Citation: Title 47, Chapters 20 and 22.</i>	A five-tier rate structure is presently in effect: 5.75% General rate for tangible personal property and selected services 9% Liquor sold for off the premises consumption 10% Restaurant meals, liquor for consumption on the premises, rental vehicles 12% Parking motor vehicles in commercial lots 14.5% Transient accommodations Note: The following portions of the sales tax go to the Convention Center Fund: 1% of sales tax from restaurant meals etc., and 4.45% of sales tax from transient accommodations. Sales tax on internet access is eliminated.	\$ 671,017,000 (a)								

ALCOHOLIC BEVERAGE TAX	Alcoholic beverages manufactured by a holder of a manufacturer's license and beverages brought into D.C. by the holder of a wholesaler's or a retailer's license. <i>D.C. Code Citation: Title 25, Chapter 9.</i>	Beer --\$2.79 per 31 gallon barrel Light wine < 14% alcohol--30¢ per gal Heavy wine >14% alcohol--40¢ per gal Champagne/sparkling wine--45¢ per gal Spirits -- \$1.50 per gallon	\$5,090,000
CIGARETTE TAX	The sale or possession of cigarettes in the District. Cigarettes sold to the military and to federal government are exempt. <i>D.C. Code Citation: Title 47, Chapter 24.</i>	\$1.00 per package of twenty cigarettes	\$ 20,765,000
MOTOR VEHICLE EXCISE TAX	Issuance of every original and subsequent certificate of title on motor vehicles and trailers. <i>D.C. Code Citation: Title 50, Chapter 22.</i>	Based on manufacturer's shipping weight 6% of fair market value-3,499 lbs or less 7% of fair market value-3,500 lbs or more	\$ 40,437,000
INDIVIDUAL INCOME TAX	The taxable income of an individual who is domiciled in the District at any time during the tax year, or who maintains an abode in the District for 183 or more days during the year. <i>D.C. Code Citation: Title 47, Chapter 18.</i>	For Calendar Year 2004: Taxable Income Tax Rate First \$10,000 5.0% Over \$10,000, but Not over \$30,000 \$500 + 7.5% of excess over \$10,000 Over \$30,000 \$2,000 + 9.0% of Excess over \$30,000	\$1,042,309,000
CORPORATE FRANCHISE TAX	Net income of corporations having nexus in the District. All corporations engaging in a trade, business or profession in the District of Columbia must register. <i>D.C. Code Citation: Title 47, chapter 18.</i>	The franchise tax rate is 9.975 percent of taxable income.	\$ 168,353,000
U. B. FRANCHISE TAX	Net income of unincorporated businesses with gross receipts over \$12,000. A 30% salary allowance for owners and a \$5,000 exemption are deductible from net income to arrive at taxable income. A business is exempt if more than 80% of gross income is derived from personal services rendered by the members of the entity and capital is not a material income-producing factor. A trade, business or professional organization that by law, customs or ethics cannot be incorporated is exempt. <i>D.C. Code Citation: Title 47, chapter 18.</i>	The franchise tax rate is 9.975 percent of taxable income.	\$ 88,347,000
PUBLIC UTILITY TAX	Gross receipts of gas, electric and local telephone companies. <i>D.C. Code Citation: Title 47, Chapter 25.</i>	11% of gross charges \$0.0077 per kwh Electricity distribution Companies	\$169,494,000
TOLL TELECOM-MUNICATIONS TAX	Gross receipts of companies providing toll telecommunication service in the District. <i>D.C. Code Citation: Title 47, Chapter 39.</i>	11% of gross charges	\$ 54,951,000
INSURANCE PREMIUMS TAX	Gross insurance premiums received on risks in the District, less premiums received for reinsurance assumed, returned premiums and dividends paid to policy-holders. The tax is in lieu of all other taxes except real estate taxes and fees provided for by the District's insurance law. <i>D.C. Code Citation: Title 31; Title 47, Chapter 26.</i>	1.7% on policy and membership fees and net premium receipts	\$ 47,452,000
ESTATE TAX	The estate of every decedent dying while a resident of the District, and on the estate of every nonresident decedent owning property having a taxable situs in the District at the time of his or her death, where the gross estate exceeds \$1,000,000. <i>D.C. Code Citation: Title 47, Chapter 37.</i>	Tax due is determined by using Form D-76 (Estate Tax Return). Return must be filed within 10 months of death.	\$ 26,466,000

DEED RECORDATION TAX	The recording of all deeds to real estate in the District. The basis of the tax is the value of consideration given for the property. Where there is no consideration or where the consideration is nominal, the tax is imposed on the basis of the fair market value of the property. <i>D.C. Code Citation: Title 42, Chapter 11.</i>	1.5% of consideration or fair market value Note: 1.1% of consideration or fair market value for residential properties worth \$250,000 or less.	\$ 164,522,000
DEED TRANSFER TAX	Each transfer of real property at the time the deed is submitted for recordation. The tax is based upon the consideration paid for the transfer. Where there is no consideration or where the amount is nominal, the basis of the transfer tax is the fair market value of the property conveyed. <i>D.C. Code Citation: Title 47 Chapter 9.</i>	1.5% of consideration or fair market value Note: 1.1% of consideration or fair market value for residential properties worth \$250,000 or less.	\$ 121,747,000
ECONOMIC INTEREST TAX	The economic interest transfer tax is triggered by the sale of a controlling interest in a business entity, including either one of the following elements. These elements are 1) 80% or more of the assets of the entity consist of real property located in the District of Columbia; or 2) more than 50% of the gross receipts of the entity are derived from ownership or disposition of real property in D.C. The consideration is not always equal to the assessed value of the property. The consideration is what is paid for the interest in the real property being transferred. If there is no consideration, then the tax basis will be the assessed value of the property owned by the corporation. <i>D.C. Code Citation: Title 42 Chapter 11.</i>	3.0% of consideration or fair market value	\$ 16,269,000
TOTAL GENERAL FUND TAXES:			\$3,665,194,000 (a)

PART B—OTHER SELECTED TAXES

TAX	DESCRIPTION OF WHAT IS TAXED	RATE	FY 2004 REVENUE
MOTOR VEHICLE FUEL TAX	Every importer of motor vehicle fuels, including gasoline, diesel fuel, benzol, benzene, naphtha, kerosene, heating oils, all liquefied petroleum gases and all combustible gases and liquids suitable for the generation of power for the propulsion of motor vehicles. <i>D.C. Code Citation: Title 47, Chapter 23.</i>	20¢ per gallon (entire tax dedicated to Highway Trust Fund)	\$ 26,660,000

Source of General Fund Revenue amounts: Government of the District of Columbia Comprehensive Annual Financial Report, Year Ended September 30, 2004

Notes: (a) Amount excludes transfers to the Convention Center Fund.
