About this report18

From 2000 to 2010, 80% of the growth in owner-occupied housing occurred in the central parts of the District

Showing a 29,662 (5.2%) growth in DC population from 10 years earlier, the 2010 Census reflects an evolving socioeconomic landscape that has given rise to new patterns of income distribution, commercial activity, and real estate development. The changes that occurred have not been evenly distributed across the city, as this analysis of owner-occupied housing patterns demonstrates.

According to the Census, there were 101,206 owner-occupied housing units in

bution of the net increase in owneroccupied housing by neighborhood groups. The map divides the District into 14 neighborhood areas: 6 centrally located ones (the "Core') and 8 others which have borders with Maryland.

The greatest increase in the number of owner-occupied units occurred in two centrally located neighborhoods: Neighborhood # 5 (U Street/Columbia Heights/Mt. Pleasant) which gained 2,970 units, and

Neighborhood #10 (Chinatown/Mt. Vernon/Shaw) which gained 2,060 units. These two areas accounted for 46.4% (27.4% and 19.0%, respectively) of the total change in DC owner-occupied units.

To get a broader sense of the spatial shifts over time, we aggregated the 14 neighborhoods into three broad categories: the Core, Upper NW, and Rest of Non-Core. Of the 10,849 net increase in owner-occupied housing that occurred from 2000 to 2010, 8,726—80.4%—occurred in the Core area. By contrast, upper Northwest experienced a gain of 576 units (5.3% of the total) and the rest of the non-Core area gained 1,547 units (14.3% of the total). The percentage gain in homeownership in the Core —28.2%—also out-paced the other two areas (2.4% in upper NW and 3.4% in the rest of the non-core area). However, in 2010 the ownership percentage in the Core area (33.3%) was still below the other areas (49.0% in upper NW and 37.4% in the other non-core area). (cont'd on p. 17)

Education and professional services (other than legal) are leading private sector job growth

- •In March education gained 3,767 jobs over last year and professional services (other than legal) gained 2,033 jobs, together accounting for about 80% of all private sector job growth. (3-month moving averages.)
- •The other private industry showing a gain of at least 1,000 over the year was organizations (1,033).
- •Private sector industries losing jobs included information, legal, employment services, and retail.
- •Local government fell by 600.
- •Over the past year, DC's share of federal employment fell slightly in both the DC metro area and the US.

Wage gains slowed in the December quarter

- Wages earned in the District of Columbia were 1.3% higher in the December quarter compared to the same quarter of 2012. The last 2 quarters have been the slowest year-over-year increases in over 3 years.
- Wages earned in DC have now grown at a slower rate than the US average for 8 quarters.
- •In the December quarter, estimated wages of DC residents grew 2.3%, and DC Personal Income grew 4.2%.
- •In the December quarter, the private sector accounted for over 100% of the \$0.81 billion increase in wages earned in DC.

Wages earned in DC, wages earned by DC residents, and wages earned in the US: 2009.4 to 2012.4

^{*} Proprietors' income is derived from federal tax data and therefore all proprietors' income is earned by DC residents.

Source: BEA; data for December were released March 27, 2013

^{**}Reflects deduction of social insurance paid by individuals. Wage and salary amounts shown are before this deduction.

^{***}Est. by ORA; assumes wage and salary suppl. are the same % for DC resident wages as for wages earned in DC.

Single family and condominium home sales

Sales and prices were again strong in April

- •The April 3-month moving total of single family home sales was up 9.5% from a year earlier, and the average selling price was 8.3% higher.
- •April condominium sales were 18.4% above a year earlier as measured by the 3-month moving total; the average selling price was 3.7% higher.
- •The total value of all home sales in April was 20.1% more than a year earlier as measured by the 3-month moving total.
- •April year-to-date median prices were up 11.9% for single family units, and up 6.7% for condominiums.
- •The April ratios of inventory to sales were 1.5 and 1.4, respectively for single family units and condominiums (3-mo. moving average).

Total value of sales of single family and condo units: April 2011 to April 2013 (% change from prior year in 3-mo. and 12-mo. moving totals)

— 3-month moving total (apr @ 20.1)

Note: Data are closed contracts settled during each month or other period shown. Because average price depends on the mix of units sold, this measure can be volatile on a month-to-month basis, and it is not intended to measure changes in the value of all residential property. Monthly average price for all single family units is calculated by ORA based on reported average prices and number of sales for different types of units.

Source: Metropolitan Regional Information Systems (MRIS); median contract price and inventory ratio data accessed through the Greater Capital Area Assn. of Realtors (GCAAR).

Apartments and single family home transactions

Occupied market rate apartment units up by 2,000 from the prior year

- •Sales of single family units at prices above \$1 million were up 24.3% in April from a year ago as measured by the 3-month moving total; they accounted for 13.9% of sales.
- •In March the quarterly Federal Housing Finance Agency house price index for DC was 11.0% higher over a year ago. For the US, there was a 6.4% rise.
- •In the March quarter, occupied apartment units rose 2,085 (2.5%) and rents rose 2.5% from a year earlier.

FHFA expanded-data housing price index for DC and the US: 2004.1 to 2013.1 (% change from prior yr. in the 12-mo. moving a vg.)

Housing permits, office and apartment outlook, and value of property transfers

Housing permits continued above the 4,000 per year rate in March

- •For the 12-month period ending March, 4,195 housing unit building permits were issued, a 23.4% increase over the prior 12-month period.
- •Delta Associates expects DC's office vacancy rate (including sublet) to fall to 9.0% over the next two years.

Value of real property transfers (including transfers of economic interest):

April 2011 to April 2013

- •Reis expects 7,305 new apartment units to be added to inventory in CY 2013 and CY 2014, and occupancy to grow by 7,082.
- •The value of April property transfers was down by 0.6% from last year as measured by the 3-month moving total. The 12-month moving total (\$10.19 billion) was 10.9% higher than last year .

Hospitality

Hotel stays and revenue higher than last year

- •In March the 3-month moving total for hotel room-days sold was 4.3% more than a year earlier. The average room rate rose 6.3%, leading to an 10.8% gain in room revenue. (These measures are affected by the January 2013 Inauguration.)
- •Employment in food services was 1.9% more in March than a year earlier as measured by the 3-month moving average. Hotel employment rose 1.1%, and retail lost 2.5%.
- •March airline traffic into the DC area was up 1.2% from a year earlier as measured by the 3-month moving total. Reagan National Airport gained 10.7%.

Economic growth picked up in the March quarter

- •March was the 15th consecutive quarter of real GDP growth. The 2.5% annual rate of growth was about typical for the post-recession recovery.
- •US employment (seas. adj.) increased by 165,000 in April.
- •The US unemployment rate (seasonally adj.) fell to 7.5% in April.
- •In April the S & P 500 index rose 1.3% from March, and was 13.3% above last year.
- •Inflation fell in April. The April CPI was 1.1% above a year earlier (sa).

^{*}Deed taxes include deed recordation, deed transfer, and economic interest taxes on real property transactions.

Note: (1) Includes public space rental (in other taxes). (2) Deed tax collections will vary from payments to Recorder of Deeds (graphed on the next page) due to processing and timing effects.

⁽³⁾ Data subject to accounting adjustments.

⁽⁴⁾ This table and the graphs on the next page include adjustments to the timing and consistency of collection reporting which make comparisons with prior year periods more accurate; accordingly, the data may vary from other OCFO reports.

Source: OCFO/ORA nm = not meaningful due to small amount of activity or negative numbers

March revenue increases were dominated by faster real property collections

- For the 12-month period ending March tax collections (before earmarking) were \$824.3 million (15.3%) more than a year earlier. The biggest increase is attributable to faster collections of real property taxes.
- •Sales and withholding gains slowed from prior months. In March the 3-month moving total for sales taxes was down 7.4% from last year, and withholding was up 4.7%.
- •The biggest gain in the 3-month total was in the real property tax (\$241.1 million—55.1%).
- •Deed tax payments to the DC Recorder of Deeds for transfers, recordation, and economic interest were down 13.1% from the prior year for the 3 months ending March For the last 12-month period, the payments were up 16.1%.

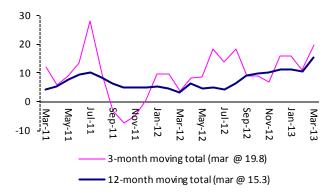

Withholding collections: Mar. 2011 to Mar 2013 (% change from prior year in 3-month and 12-month moving totals)

Collections for the General Sales tax and Individual Income tax withholding: Jan. 2012 to Jan. 2013 (% change in 3-month moving totals)

DCTax Collections (before earmarking): March 2011 to March 2013 (% change in 3-month and 12-month moving totals)

Sales tax collections: Mar. 2011 to Mar. 2013 (% change from prior year in 3-month and 12-month

Payments to DC Recorder of Deeds for recordation, transfer, and e conomic interest taxes: April 2011 to April 2013

US economic forecasts

The May Blue Chip Indicators was slightly less optimistic for FY 2013

- •The May Blue Chip Indicators lowered its FY 2013 forecast for real GDP to 1.8%, slower than FY 2012's actual (2.3%). FY 2014 is forecast to grow at a 2.5% rate. Since FY 2000, GDP growth has exceeded 2.5% in only 3 years: FY 2004, 2005, and 2006.
- •The May Blue Chip Indicators lowered its inflation forecasts for FY 2013 and FY 2014 to 1.6% and 1.8%, respectively.
- •S and P 500: The April forecasts for the last quarter of 2013 are higher than they were in March. The range of estimates: -3.0 to 12.8% for the last quarter of 2013.

April forecasts for DC income are mixed

- *Employment:* Global Insight raised its FY 2013 forecast and Economy.com lowered theirs, bringing them closer together. The range of job changes for FY 2013 is 3,566 to 5,211; and for FY 2014: -509 to 8,683.
- *Unemployment:* Unemployment rate forecasts did not change much. The unemployment rate forecast range for FY 2013 is from 8.5% to 8.7%.
- Wages earned in DC: Global Insight reduced its FY 2013 wage growth for DC, while Economy.com raised its estimate. Growth of less than 2.3% is expected in FY 2013, and 2.9% or higher in FY 2014. The range: 0.7% to 2.3% in FY 2013; 2.9% to 5.6% in FY 2014.
- Wages earned by DC residents: Global Insight anticipates negative growth in FY 2013. The range: -2.1% to 1.8% in FY 2013, and 0.4% to 4.4% in FY 2014. The forecasts for the growth in resident wages are below those for growth in wages earned in DC, a sharp reversal of recent trends.

DC revenue estimate

The February revenue estimate anticipates continued revenue growth in FY 2013 and FY 2014

- •Tax revenue growth of \$109 million in FY 2013 and \$139 million in FY 2014 (gains of 1.9% and 2.3%, respectively) are significantly lower than that which occurred in FY 2012 (\$537 and 10.1%). This reflects one-time increases in FY 2012, slowing employment growth in DC, and allowances for the impact of a sequester or other cutbacks in federal spending.
- •Sales and income taxes are major sources of growth in FY 2013; real property accounts for more than half of the growth in FY 2014.
- •In FY 2013 and FY 2014 taxes represent a slightly lower share of Personal Income than in FY 2012 which was the highest percentage in 4 years.

Owner occupied housing, continued from p.1

The tables below provide more details on each of the 14 neighborhood areas and the 3 summary areas. Neighborhoods within a summary areas are by no means all alike. Some highlights:

- Five of the six neighborhoods that experienced a net increase of more than 900 owner-occupied units were in the Core. The exception was Anacostia/Congress Heights/Bellevue, which added 977 owner-occupied units.
- With one exception, the neighborhoods that added more than 900 owner-occupied units still had owner-occupied rates below the city average in 2010. The exception was Capitol Hill.
- Except for Dupont/Adams Morgan, the owner-occupied rate rose in each Core area neighborhoods. The owner-occupied rate fell in all non-core neighborhoods except for Tenleytown and Anacostia/Congress Heights/Bellevue.

In the period since the 2010 Census the composition and distribution of owner-occupied housing in DC has continued to change due to the impact of foreclosures and additions to the housing stock.

—Marvin Ward, ORA

ORA Reports and Documents

From time to time the Office of Revenue Analysis prepares revenue estimates, fiscal impact statements on pending legislation, reports, and other documents on subjects related to DC 's economy and taxes. These documents are posted on the OCFO web site (www.cfo.dc.gov) under subcategories of "Reports and Publications" and "Budget and Revenue."

Recent ORA reports:

Revised Revenue estimates for FY 2013 to FY 2017, February 22, 2013. Quarterly revenue estimate shows differences from the prior estimate, describes economic assumptions and changes in each tax, and contains details of each tax and of key economic variables.

Briefing documents. A new series with information related to DC's economy and taxes.

DC Tax Facts, 2012. Details on all DC taxes.

Tax Rates and Tax Burdens 2011 Nationwide. This annual publication compares DC tax rates and estimated DC tax burdens for households of different income levels with the rates and burdens of state and local taxes in the principal cities in all 50 states.

Tax Rates and Tax Burdens 2011 Washington Metropolitan Area. This annual publication compares DC tax rates and estimated DC tax burdens for households of different income levels with the rates and burdens of the surrounding jurisdictions in the DC metropolitan area.

About this report.

District of Columbia Economic and Revenue Trends is generally issued about the third week every month. Employment and most other DC information reported on a monthly basis is from one or two months prior to the Trends date (the May report has mostly March and April data). Lags can be greater with quarterly data such as Personal Income and commercial real estate. Data in the tables are believed to be reliable, but original sources are definitive. All data are subject to revision by the information source. The Trends report is available at the DC Chief Financial Officer web-site: www.cfo.dc.gov (click on Budget and Revenue/Economy/ Economic and Revenue Trends).

Table 35. Information sources

Indicator	So ur ce	Period covered in this report	Next release
D.C. Jobs and Labor Force information	BLS	February	April 29
